Ernst Paris

Company founder Albrecht Jung

Progress as tradition. Every day.

When Albrecht Jung founded his company in 1912, three things were already important to him: progress, quality and design. These principles have characterised JUNG to date and are noticeable and can be experienced in all parts of the company.

“Progress as tradition” is an attitude, the commitment to constant new thinking. A commitment to the development of ideas that create something new, for easier use, better functionality, more attractive appearance and more customer-friendly service. This motivates and unites us at JUNG. Every day.

WE ARE JUNG:

1912

Medium sized third generation family company

“Made in Germany” for more than 100 years.

Around 1,200 employees

17 subsidiaries and over 70 agencies worldwide

When is a building smart?

When all its functions of modern building system technology are practically interlinked and communicate with each other. This means extra comfort, cost-effectiveness, safety and energy efficiency. Our solutions are based on the global KNX standard and are therefore absolutely future-proof. From the easy to use control element to the complex system, the JUNG KNX components provide comprehensive, future-proof solutions for control, visualisation and organisation of the building system technology. Areas such as lighting, shade, heating / air conditioning, surveillance / security, multimedia and smart metering are completely covered here.

From the basic configuration to the high-end comfort solution, everything is possible. The professional JUNG KNX technology can be adapted to new requirements at any time.

Evaluation

System
reliability

KNX – the worldwide systematic standard

KNX is the only globally recognised standard for building system technology. The European standard EN 50090 has become established as global standard according to ISO / IEC 14543-3. The „KNX“ label makes clear the system compatibility of the products of all manufacturers.

FACTS AND FIGURES

1990 28 years of experience

76.392 partners in
164 countries

442 manufacturers in
44 countries

444 training centres in
68 countries

Date: May 2018

FUTURE-PROOF

KNX as building system technology is consistently further developed. As international standard, KNX is future-oriented and guarantees constant upgradeability when new components appear, also manufacturer-independent.

INVESTMENT SECURITY

High quality, certified KNX products and the global standardisation guarantee a sustainable investment in a long-lasting system. The KNX system has existed for more than 25 years and first generation devices are still compatible with the latest KNX products.

SYSTEM RELIABILITY

Products with the KNX logo „speak and understand“ the KNX language. They are programmed and put into operation using the manufacturer-independent Engineering Tool (ETS™). Strict KNX interworking rules ensure that the certified products of different manufacturers can communicate with each other in various applications. KNX has standardised complete sets of data types for a large number of functions for this.

DECENTRALISED SYSTEM DESIGN

KNX functions as a modular system. Network and building technology can thus be expanded and rebuilt in any way at any time. Customised and economic solutions can always be found for small or large projects, modernisation or new construction.

Life in the smart home: Functions and applications

KNX is the future-proof solution for the professional smart home: the lighting scene in the living room matches the well-being temperature perfectly. It stays pleasantly cool in the bedroom because the shutters automatically descend during sunlight. The favourite music can be heard in every room thanks to multi-rooming. With intelligent technology from JUNG.

LIGHTING

Individual control of the indoor and outdoor lighting. Automatically, as needed and thus energy saving.

MONITORING/ALARMING

Sensors for monitoring windows and doors, central on/off controls and notification and alarm systems give a secure feeling.

MULTIMEDIA

Multi-rooming in the entire house, TV and entertainment systems and multimedia components are integrated in KNX.

BLINDS AND SHUTTERS

The automatic control of blinds and shutters including louvre adjustment is regulated by sunlight. The control is performed centrally or decentralised.

HEATING, VENTILATION, AIR CONDITIONING

Demand-based control of heating, ventilation and air conditioning ensure not only the individual well-being temperature but also a healthy room climate.

VISUALISATION AND REMOTE CONTROL

Display and operate all states in your own home using touch displays. Also when on the move from smart phones and tablets.

House at Achalm, Reutlingen

Architect: ALEXANDER BRENNER ARCHITEKTEN

Fitted with JUNG KNX technology
in the LS 990 design.

Cultivated objectivity

Smart building technology in prestigious architecture – combined in one high requirement: always only the best. Owners in the whole world have confidence in the intelligent KNX technology for their homes. Realised in the versatile JUNG design, pure aesthetics become cultivated objectivity.

Smart and economical

Investment security is the main argument for the decision for building automation in office and administrative building construction. It should be economic, energy-efficient and functional. Also important: Flexibility in adaptation to changing renting situations. The good thing here is that owners and planners worldwide can rely here on the smart KNX solutions of JUNG.

in the LS 990 design.

Intelligent comfort

Hotel operators worldwide have confidence in the advantages of intelligent KNX technology from JUNG. Whether well-known hotel chains such as the Hyatt Group with its Park Hyatt Vienna in Austria or first-class family and design hotels: with KNX, maximum comfort for the guest is combined with reliability and cost effectiveness for the operating company in a uniquely smart way.

Systematically linked: the JUNG KNX system

Central control

22

MANUAL SENSORS

The execution of the commands and implementation of the physical states for the manual sensors are performed manually by pressing buttons or rotary movements. The information is forwarded via the KNX bus to the implementing devices.

116

AUTOMATIC SENSORS

Presence detectors, weather stations or room thermostats, among other things, convert physically measured factors into electrical values, process these and send a telegram on the KNX bus for implementation of the relevant commands.

146

SYSTEM DEVICES

The different KNX system devices are needed for the establishment of the bus structure (line and area couplers), as interfaces for the programming and operation of the KNX installation.

158

GATEWAYS

The KNX gateways form an interface between KNX and an external network. Thereby, they translate the incoming and outgoing messages and transfer the data of the two different networks.

162

ACTUATORS

Actuators receive information from the sensors, execute commands and feed back current states to the display elements of the sensors. Appropriate actuators in different designs are available in the JUNG KNX system for every application.

236

CENTRAL CONTROL

The various KNX central control units form the node for networking and common control of all KNX functions, both room-related as well as for the entire building.

Operate KNX in the JUNG design

THE F 50 COMPACT ROOM CONTROLLER

LS 990 in black/chrome

PUSH-BUTTON SENSOR F 50

Operating buttons on the left and right, large cover in the middle.

PUSH-BUTTON SENSOR F 40

Simply press: large buttons for control of the building technology.

PUSH-BUTTON BCU

Looks like a usual switch; however controls smart KNX functions.

ROTARY SENSOR

As for a conventional rotary dimmer: turn, press, initiate function.

When the design makes the operation self-explanatory: the KNX sensors in the JUNG design. High-quality materials and clear forms complement the concept with style.

PUSH-BUTTON SENSOR F 40
LS 990 in stainless steel

Clear labelling

JUNG components are labelled according to individual requirements using the Graphic Tool. Using laser engraving or colour printing process depending on material and colour. Whether manufactured for the entire building or for one piece. Inscription fields can also be printed independently above the labelling.

LASER ENGRAVING

Precise erosion of the surface for a particularly valued appearance: the finest contours of symbols and texts must also be realised using laser engraving. A striking form of product refinement, particularly for the metal variants.

Labelling in the catalogue part: **L**

COLOUR PRINTING

Easily integrate the design of the electrical installation in the own corporate design – using abrasion-resistant colour printing. Symbols, individual texts and patterns also give the elements an unmistakable look.

Labelling in the catalogue part: **P**

LABELLING

Many Jung products have an integrated labelling field. These can be printed with text or symbols using the labelling. The functions of KNX sensors and more are clearly identified.

Graphic-Tool on-line: jung.de/gt

PUSH-BUTTON SENSOR F 50

LS 990 in aluminium/chrome

The F 50 sensors provide plenty of space on the concise information area for individual marking with the graphic tool. Operation is then via the buttons arranged at the side.

The F 50 family

PUSH-BUTTON SENSORS

For the control of functions and scenes. The scope of delivery includes the transparent design with a large labelling area as standard; this can optionally be replaced with a coloured version.

PUSH-BUTTON SENSORS RF

KNX RF is the manufacturer-independent KNX wireless standard. These push-button sensors have the same operating concept and design as the well-known push-button sensors with twisted pair connection.

COMPACT ROOM CONTROLLER

Impressive thanks to an intuitive operating concept and two integrated temperature controllers. The backlit LC display clearly legibly shows the most important values and functions.

ROOM TEMPERATURE CONTROLLER

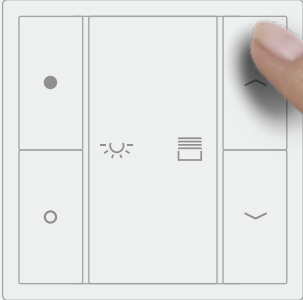

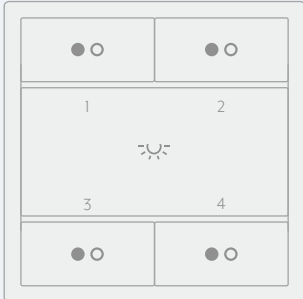

Device for individual room temperature control. The preference can be changed to the push-button sensor functions of switching, dimming, blinds, transducers, or scenes.

PUSH-BUTTON SENSOR F 50
LS ZERO in aluminium

Individual button assignment

<p>TWO BUTTONS OPERATION</p>  <p>Two functions (operation left/right)</p>	<p>TWO BUTTONS OPERATION</p>  <p>Two functions (operation up/down)</p>
<p>ONE BUTTON OPERATION</p>  <p>Four functions (toggle)</p>	<p>ONE BUTTON OPERATION</p>  <p>Possible in one or two button operation</p>

For the Standard and Universal F 50 push-button sensors two operating modes can always be set: one button operation and two buttons operation. In the case of the two buttons variant, the operation can be optionally programmed for up/down or left/right. Horizontal mounting with appropriate button assignment can also be realised.

THE F 50 COMPACT ROOM CONTROLLER

A creation in black with glass frame

Illuminating: the RGB LEDs

Universal F 50 push-button sensors have one operation LED and a status LED per button. These can be freely set in red, green and blue. The LEDs and the illuminated labelling area can each be adjusted for brightness so that, for example, one LED can be used as pilot light.

Versatile functionality

INSCRIPTION AREAS

The inscription areas exist as transparent version and as coloured variant – that is unique in the market.

OPTIMISED: THE INSTALLATION

Flat design and low installation depth make the push-button sensors easy to mount. The easily accessible terminals for the KNX bus and the push-button extension module are clearly labelled:

- 1 Extension module
- 2 KNX bus

PRACTICAL: THE CONSTRUCTION SITE COVERAGE

Thanks to the construction site coverage, button and function assignment can already be realised in construction site operation. The decision for button and cover design thus has time until the project acceptance.

INTEGRATED: THE TEMPERATURE SENSOR*

The temperature at various places in the room can be measured with the temperature sensor. The values are transmitted to the room temperature controller or room controller for effective control.

ILLUMINATING: THE LIGHT SCENE MEMORY*

Up to eight light scenes can be stored in the integrated light scene memory; in turn, eight groups can be assigned to each scene. These scenes can be called up using buttons or other KNX commands.

*only for Universal version

Efficient and flexible: push-button extension module F 50

COST SAVING

In comparison with exclusive use of push-button sensors in the KNX installation shown, the saving is 40%.

PUSH-BUTTON EXTENSION MODULE

The functions can be extended by connecting the 1- to 4-gang push-button extension module, while at the same time minimising the load on the bus. Particularly the option for installation of the extension module at a distance of up to 30 m provides more flexibility.

- KNX line
- Basic module
- Extension module

Variety of designs

High quality materials, distinctive forms and a wide variety of colours determine the JUNG design. The AS, A, CD and LS ranges give the KNX sensors their attractive appearance. They can be selected to match the ambiance for each room.

Modular system

The 1, 2, 3 and 4-gang F 50 modules are available in the JUNG design; also the corresponding 1 to 4-gang Cover kits. The transparent or coloured labelling field is optionally added to this. The design frames of the various ranges round off the concept.

Ref.-no.

Standard push-button module

including transparent cover ref.-no.: A 50 NA

Intended use

- Operation of loads, e.g. light on/off, dimming, blinds up/down, calling up and saving light scenes, etc.
- Installation in flush-box according to DIN 49073

Product characteristics

- Push-button functions for switching, dimming, blinds control, valuator, light scenes, etc.
- To be completed with cover kit
- Inscription field
- One red status LED for a pair of buttons
- One operation LED as orientation light and programming status – red, green or blue, adjustable
- Energy saving mode
- Integrated bus coupling unit
- Transparent cover kit (included) for temporary site use without design covers

Standard push-button module, 1-gang

for cover kit 1-gang, complete, ref.-no.: A 501 TSA ..

Ref.-no.

Universal push-button module

including transparent cover ref.-no.: A 50 NA

Intended use

- Operation of loads, e.g. light on/off, dimming, blinds up/down, brightness values, temperatures, calling up and saving light scenes, etc.
- Installation in flush-box according to DIN 49073

Product characteristics

- Push-button functions for switching, dimming, blinds control, valuator, light scenes, etc.
- One or two functions per button
- To be completed with cover kit
- Inscription field can be illuminated
- One status LED per button, red, green or blue, adjustable
- One operation LED as orientation light and programming status – red, green or blue, adjustable
- Brightness of status LED, operation LED and inscription field adjustable, can be changed during operation, e.g. during night times
- Measurement of room temperature
- Extension unit for room temperature controller
- Disabling function: Disabling or change function mode of single or all button functions
- Alarm function, optional acknowledge by pressing any button
- Energy saving mode
- Integrated bus coupling unit
- Connection for a push-button extension module, 1-4 gang
- Transparent cover kit (included) for temporary site use without design covers

Ref.-no.

Room temperature controller module 2-gang

including transparent cover and inlay with symbols
for cover kit 2-gang, complete, ref.-no.: A 502 TSA ..

A 5178 TSM

Intended use

- Single-room temperature control in KNX installations
- Operation of loads, e.g. light on/off, dimming, blinds up/down, recalling and saving light scenes, etc.
- Installation in wall box according to DIN 49073

Product characteristics

All buttons can be assigned with push-button sensor functions or functions for controller operation.

- Measurement of the room temperature
- Room temperature control with setpoint value specification
- Extension for room temperature controller
- Push-button functions switching, dimming, blind control, value transmitter, scene recall, etc.
- One or two functions per button
- Completion with cover kit 2-gang
- Illuminable inscription field
- Two red status LEDs per button – red, green or blue adjustable
- One operation LED as an orientation light and to indicate the programming status – red, green or blue adjustable
- Brightness of status LED, operation LED and labelling field adjustable; switchable while in operation, e.g. during the night
- Disabling function: Disable or function switch-over of all or of individual push-button functions
- Alarm function, optionally with confirmation by pressing any button
- Energy saving mode (for operation without controller function)
- Integrated bus coupling unit
- Connection for a push-button extension module, for extension with up to eight additional buttons

Push-button extension module

including transparent cover ref.-no.: A 50 NA
for the extension of the Universal push-button module (ref.-no.: A 509.. TSM) and
room temperature controller module (ref.-no.: A 5178 TSM) with up to 4 additional push-buttons

1-gang	A 5091 TSEM
2-gang	A 5092 TSEM
3-gang	A 5093 TSEM
4-gang	A 5094 TSEM

Product characteristics

- One or two functions per button
- To be completed with cover kit
- Inscription field can be illuminated
- One status LED per button, red, green or blue, adjustable
- One operation LED as orientation light and programming status – red, green or blue, adjustable
- Brightness of status LED, operation LED and inscription field adjustable, can be changed during operation, e.g. during night times
- Measurement of room temperature
- Extension unit for room temperature controller
- Disabling function: Disabling or change function mode of single or all button functions
- Alarm function, optional acknowledge by pressing any button
- Energy saving mode
- Transparent cover kit (included) for temporary site use without design covers
- Cable lengths: max. 30 m, cable type: J-Y(St)Y 2 x 2 x 0.8 mm²

Ref.-no.

Room controller display compact module 2-gang

for cover kit 2-gang, complete, ref.-no.: A 502 TSA ..
 can be extended by means of a room controller extension module, ref.-no.: A 5178 TSEM
 can be extended by means of a push-button extension module, ref.-no.: A 509.. TSEM

A 5192 KRM TS D

recommended mounting height: 1.5 m

Room controller display compact module 4-gang

for cover kit 4-gang, complete, ref.-no.: A 504 TSA ..
 can be extended by means of a room controller extension module, ref.-no.: A 5178 TSEM
 can be extended by means of a push-button extension module, ref.-no.: A 509.. TSEM

A 5194 KRM TS D

recommended mounting height: 1.5 m

Intended use

- Measurement and feedback control of the room temperature
- Operation of loads, e.g. light on/off, dimming, blinds up/down, brightness values, temperatures, calling up and saving light scenes, etc.
- Installation in wall box according to DIN 49073

Product characteristics

Each button can be used for push-button sensor of controller functions.

- Backlit LC display
- One or two functions per button
- To be completed with cover kit
- Eight status LED – red, green or blue
- Brightness of status LED and LCD adjustable
- Integrated bus coupling unit
- Connection of extension modules
- Integrated room temperature sensor
- External sensor (ref.-no.: FF 7.8) can be connected
- Room temperature control with setpoint value specification
- Two internal independent controllers for two independent areas – in connection with extension modules
- Display of room or set temperature (°C or °F)
- Display of outdoor temperature – with external sensor, e.g. weather station
- Display of time, in conjunction with KNX time encoder
- Push-button function or rocker function
- Inhibit function: blocking or change of function of the entire or single button functions
- Alarm function, optional with acknowledge by pressing any button

Room controller extension module 2-gang

for cover kit 2-gang, complete, ref.-no.: A 502 TSA ..
 for the extension of a room controller module (ref.-no.: A 5192 KRM TS D, A 5194 KRM TS D) with a second room temperature control unit

A 5178 TSEM

Intended use

- Operation of loads, e.g. light on/off, dimming, blinds up/down, brightness values, temperatures, calling up and saving light scenes, etc.
- Measurement of room temperature
- Extension for room controller modules (.. 5192 KRM TS D, .. 5194 KRM TS D)
- Installation in wall box according to DIN 49073
- Cable lengths: max. 30 m, cable type: J-Y(St)Y 2 x 2 x 0.8 mm²

- One status LED per button, red, green or blue, adjustable
- One operation LED as orientation light and programming status – red, green or blue, adjustable
- Brightness of status LED, operation LED and inscription field adjustable, can be changed during operation, e.g. during night times
- Measurement of room temperature
- Extension unit for room temperature controller
- Disabling function: Disabling or change function mode of single or all button functions
- Alarm function, optional acknowledge by pressing any button
- Energy saving mode
- Integrated bus coupling unit
- Connection for a push-button extension module, 1-4 gang
- Transparent cover kit (included) for temporary site use without design covers

Universal push-button module, 1-gang

for cover kit 1-gang, complete, ref.-no.: CD 501 TSA ..

can be extended by means of a push-button extension module, ref.-no.: CD 509.. TSEM

CD 5093 TSM

Universal push-button module, 4-gang

for cover kit 4-gang, complete, ref.-no.: CD 504 TSA ..

can be extended by means of a push-button extension module, ref.-no.: CD 509.. TSEM

ETS product family: Push-button

Product type: 4-gang push-button

CD 5094 TSM

Ref.-no.

Room temperature controller module 2-gang

including transparent cover and inlay with symbols
for cover kit 2-gang, complete, ref.-no.: CD 502 TSA ..

CD 5178 TSM**Intended use**

- Single-room temperature control in KNX installations
- Operation of loads, e.g. light on/off, dimming, blinds up/down, recalling and saving light scenes, etc.
- Installation in wall box according to DIN 49073

Product characteristics

All buttons can be assigned with push-button sensor functions or functions for controller operation.

- Measurement of the room temperature
- Room temperature control with setpoint value specification
- Extension for room temperature controller
- Push-button functions switching, dimming, blind control, value transmitter, scene recall, etc.
- One or two functions per button
- Completion with cover kit 2-gang
- Illuminable inscription field
- Two red status LEDs per button – red, green or blue adjustable
- One operation LED as an orientation light and to indicate the programming status – red, green or blue adjustable
- Brightness of status LED, operation LED and labelling field adjustable; switchable while in operation, e.g. during the night
- Disabling function: Disable or function switch-over of all or of individual push-button functions
- Alarm function, optionally with confirmation by pressing any button
- Energy saving mode (for operation without controller function)
- Integrated bus coupling unit
- Connection for a push-button extension module, for extension with up to eight additional buttons

Push-button extension module

including transparent cover ref.-no.: CD 50 NA

for the extension of the Universal push-button module (ref.-no.: CD 509.. TSM) and
room temperature controller module (ref.-no.: CD 5178 TSM) with up to 4 additional push-buttons

1-gang	CD 5091 TSEM
2-gang	CD 5092 TSEM
3-gang	CD 5093 TSEM
4-gang	CD 5094 TSEM

Product characteristics

- One or two functions per button
- To be completed with cover kit
- Inscription field can be illuminated
- One status LED per button, red, green or blue, adjustable
- One operation LED as orientation light and programming status – red, green or blue, adjustable
- Brightness of status LED, operation LED and inscription field adjustable, can be changed during operation, e.g. during night times
- Measurement of room temperature
- Extension unit for room temperature controller
- Disabling function: Disabling or change function mode of single or all button functions
- Alarm function, optional acknowledge by pressing any button
- Energy saving mode
- Transparent cover kit (included) for temporary site use without design covers
- Cable lengths: max. 30 m, cable type: J-Y(St)Y 2 x 2 x 0.8 mm²

recommended mounting height: 1.5 m

Intended use

- Measurement and feedback control of the room temperature
- Operation of loads, e.g. light on/off, dimming, blinds up/down, brightness values, temperatures, calling up and saving light scenes, etc.
- Installation in wall box according to DIN 49073

Product characteristics

Each button can be used for push-button sensor of controller functions.

- Backlit LC display
- One or two functions per button
- To be completed with cover kit
- Eight status LED – red, green or blue
- Brightness of status LED and LCD adjustable
- Integrated bus coupling unit
- Connection of extension modules
- Integrated room temperature sensor
- External sensor (ref.-no.: FF 7.8) can be connected
- Room temperature control with setpoint value specification
- Two internal independent controllers for two independent areas – in connection with extension modules
- Display of room or set temperature (°C or °F)
- Display of outdoor temperature – with external sensor, e.g. weather station
- Display of time, in conjunction with KNX time encoder
- Push-button function or rocker function
- Inhibit function: blocking or change of function of the entire or single button functions
- Alarm function, optional with acknowledge by pressing any button
- Function symbols can be shown

PUSH-BUTTON SENSOR F 40

LS 990 in stainless steel

Easy operating concept meets straight line design: The KNX sensors of the F 40 family focussed on large, square control buttons for comfortable handling.

The F 40 family

PUSH-BUTTON SENSORS

Thanks to the large-area buttons, a simple and comfortable operating concept for control of functions and scenes is produced for 1 to 4-gang F 40 push-button sensors.

PUSH-BUTTON SENSORS RF

KNX RF is the manufacturer-independent KNX wireless standard. The RF push-button sensors have the same operating concept and design as the well-known push-button sensors with twisted pair connection.

COMPACT ROOM CONTROLLER

With three control panels for switching, dimming or blind control. The preset functions are executed using the markings on the left and right on the display; the buttons can be freely parametrised.

ROOM CONTROLLER OLED

This room controller has a high resolution graphical display with brilliant presentation including plain text display. In accordance with the F 40 concept, the handling is also performed using the large-area buttons.

PUSH-BUTTON SENSOR F 40
LS 990 surface-mounted design in aluminium

Individual button assignment

One button or two button operation can be set as operating modes for the F 40 push-button sensors. One operating button can be configured in each case as rocker or button. For the rocker function, an operating button is divided into two operating pressure points with the same basic function. In contrast for the button function, an operating button is evaluated in two operating points with two individually parameterisable functions. Horizontal mounting can also be realised.

With regard to design and operating concept, the F 40 push button sensors come close to a conventional switch. This also makes the handling easy for users not used to KNX. The large areas can be labelled easily and clearly recognisable that further optimises the operation using the Graphic Tool.

PUSH-BUTTON SENSOR F 40

LS 990 in Dark

Versatile functionality

EXTENSION MODULE CONNECTION*

The flat push-button extension module can be directly connected to the main module for flexible extension of the functions. It is mounted in a 2-gang frame using a special supporting ring. Advantage also for the retrofitting. No separate flush-mounted box is needed.

THE CONSTRUCTION SITE COVERAGE

Thanks to the construction site coverage, button and function assignment can already be realised in construction site operation. The decision for button and cover design thus has time until the project acceptance.

PUSH-BUTTON QUICK MOUNTING

The operating buttons are provided as complete Cover kit on a mounting aid for quick mounting. Each button can also be individually replaced, e.g. for a laser-cut or printed version.

INTEGRATED: THE TEMPERATURE SENSOR*

The temperature at a different place in the room can be measured with the temperature sensor. The values are transmitted to the room temperature controller or room controller for effective control.

ILLUMINATING: THE LIGHTING SCENE MEMORY*

Up to eight light scenes can be stored in the integrated light scene memory; in turn, eight groups can be assigned to each scene. They can be recalled using the buttons or other KNX commands.

* only for Universal version

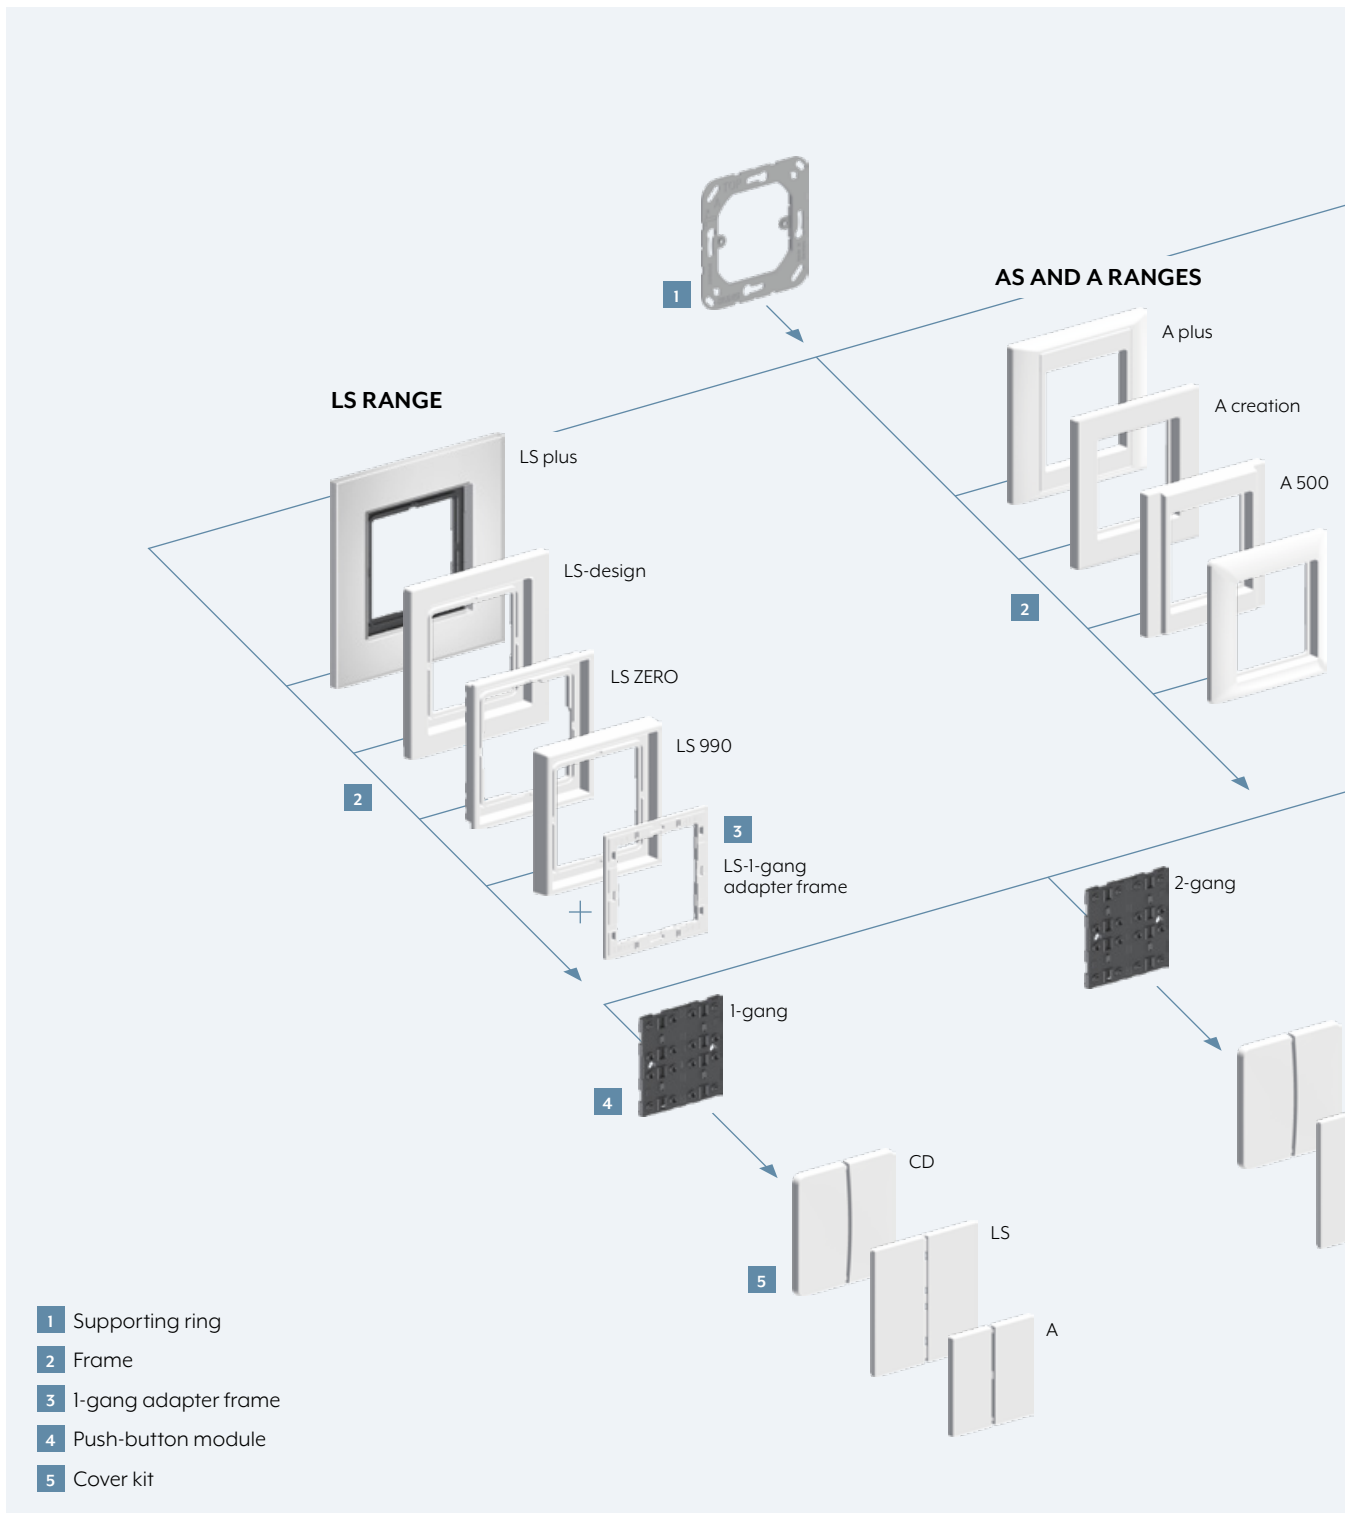

PUSH-BUTTON SENSOR F 40
LS ZERO in aluminium

Variety of designs

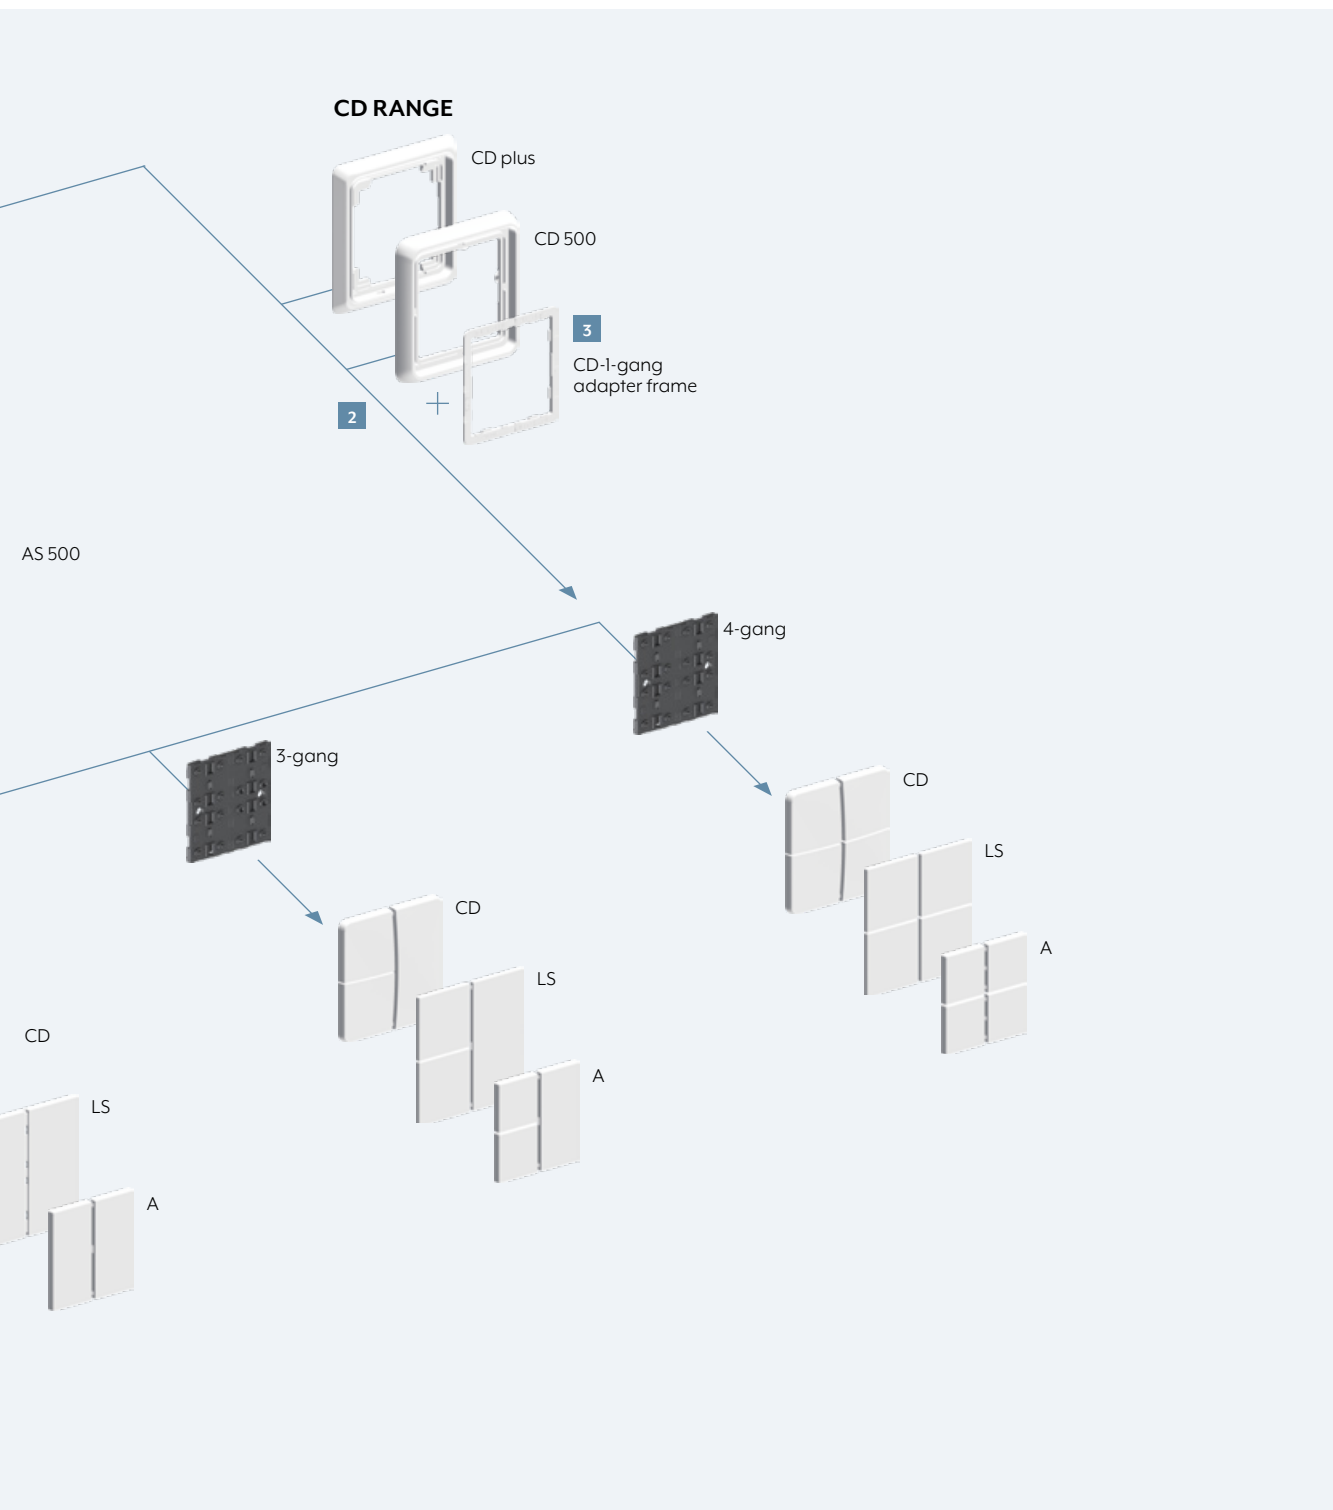

The AS, A, CD and LS ranges give the KNX sensors of the F 40 family their attractive appearance. Genuine materials, distinctive forms and a wide variety of colours determine the JUNG design. They can be matched to any ambiance.

F 40 – numerous combination possibilities

Flexibility for the planning: There are identical modules as basis for all design variants for the F 40 sensors. Thus, the switch program can even still be selected after the mounting. The corresponding Cover kits and frames are available in the JUNG design ranges.

Standard push-button module**Intended use**

- Operation of loads, e.g. light on/off, dimming, blinds up/down, calling up and saving light scenes, etc.
- Installation in flush-box according to DIN 49073

Product characteristics

- Push-button functions for switching, dimming, blinds control, valuator, light scenes, etc.
- To be completed with cover kit
- One red status LED per button
- One blue operation LED as an orientation light and to indicate the programming status
- Integrated bus coupling unit
- Transparent cover kit (included) for temporary site use without design covers

Standard push-button module, 1-gang

for cover kit 1-gang, complete, ref.-no.: .. 401 TSA ..

for cover 1-gang with symbols, ref.-no.: .. 401 TSAP ..

Adapter frames are included in delivery: ref.-no. LS 4 AR for LS range (pre-mounted) and ref.-no. CD 4 AR for CD range. AS / A ranges without adapter frame.

Only with the ETS 3.0d version or later versions the full functionality will be available.

Room controller F 40

KNX OLED ROOM CONTROLLER

KNX ROOM CONTROLLER DISPLAY COMPACT MODULE

With three control panels for switching, dimming or blind control the preset functions are executed using the markings on the left and right on the display; the buttons can be freely parametrised.

KNX OLED ROOM CONTROLLER

This room controller has a high resolution OLED graphical display with brilliant presentation including plain text display. The large buttons are used for the operation.

The room functions and scenes are controlled with the room controllers of the F 40 family using the large operating buttons. Status and function selection are shown on the graphical display. Centrally arranged, coloured LEDs for operation and status display round off the easy handling.

Ref.-no.

Room controller display compact module

can be extended by means of a push-button extension module, ref.-no.: 409.. TSEM
 Adapter frames are included in delivery: ref.-no. LS 4 AR for LS range (pre-mounted)
 and ref.-no. CD 4 AR for CD range. AS / A ranges without adapter frame.

4093 KRM TS D

recommended mounting height: 1.5 m

Intended use

- Measurement and feedback control of the room temperature
- Operation of loads, e.g. light on/off, dimming, blinds up/down, brightness values, temperatures, calling up and saving light scenes, etc.
- Installation in wall box according to DIN 49073

Product characteristics

All buttons can be assigned with functions for controller operation.

- Four red status LEDs
- A blue operation LED as an orientation light and to indicate the programming status
- Integrated bus coupling unit
- Connection of push-button extension module
- Integrated room temperature sensor
- Room temperature control with setpoint value specification
- Display of room or set temperature
- Display of outdoor temperature – with external sensor, e.g. weather station
- Display of time, in conjunction with KNX time encoder
- Push-button functions for switching, dimming, blinds control, valuator, light scenes, etc.
- Push-button function or rockers function, vertical or horizontal
- Fan coil application with up to 8 fan speeds and auto function
- Transparent cover kit (included) for temporary site use without design covers

Push-button extension module

for the extension of up to 4 additional push-buttons for the devices:

- Universal push-button module (ref.-no. 419.. TSM)
- Room controller display compact module (ref.-no. 4093 KRM TS D)
- Room controller display module 2-gang (ref.-no. RCD .. 4092 M)
- Smart Control KNX (ref.-no. SC 1000 KNX)

preferred installation: vertical

Adapter frames are included in delivery: ref.-no. LS 4 AR for LS range (pre-mounted)
 and ref.-no. CD 4 AR for CD range. AS / A ranges without adapter frame.

to combine push-button modules with LS range

Also included in delivery of modules.

LS 4 AR

	Ref.-no.
Room controller display module 2-gang	
can be extended by means of a push-button extension module, ref.-no.: 409.. TSEM	
for CD range	RCD CD 4092 M
for LS range	RCD LS 4092 M

recommended mounting height: 1.5 m

Intended use

- Operation of consumers, e.g. lights on/off, dimming, blinds/shutters up/down, brightness values, temperatures, storing and recalling of light scenes etc.
- Room temperature control
- Installation in mounting box according to DIN 49073

Product characteristics

- Push-button functions for switching, dimming, blinds control, valuator, light scenes, etc.
- Vertical and horizontal key/rocker functions
- Two red LEDs per control key as status or operation indicators
- Display of values and texts
- Running text display for one or two messages with max. 14 characters
- Integrated room temperature sensor
- Room temperature control with setpoint value preset
- Display of room temperature and setpoint temperature
- Indication of outside temperature (only with external sensor)
- Integrated bus coupling unit
- In combination with Facility Pilot "Multi-Room Control": music play control, display of music titles, artists, etc.
- Display unit for the KNX central alarm unit
- Fan coil application with up to 8 fan speeds and auto function
- OLED graphic display with high resolution
- High contrast
- Viewing angle 170° from each direction
- Transparent cover kit (included) for temporary site use without design covers
- Connection for a push-button extension module, 1-4 gang

Push-button extension module

for the extension of up to 4 additional push-buttons for the devices:

- Universal push-button module (ref.-no. 419.. TSM)
- Room controller display compact module (ref.-no. 4093 KRM TS D)
- Room controller display module 2-gang (ref.-no. RCD .. 4092 M)
- Smart Control KNX (ref.-no. SC 1000 KNX)

preferred installation: vertical

Adapter frames are included in delivery: ref.-no. LS 4 AR for LS range (pre-mounted)

and ref.-no. CD 4 AR for CD range. AS / A ranges without adapter frame.

KNX RF

KNX RF RADIO CONVERTER

Interface between KNX RF and KNX TP

KNX RF RADIO HAND-HELD TRANSMITTER

2-gang and 4-gang version

KNX RF RADIO WALL TRANSMITTER

Operating philosophy F 40

KNX RF RADIO WALL TRANSMITTER

Operating philosophy F 50

The KNX radio standard in the JUNG design: the radio wall transmitter in the F 50 and F 40 families is ideal for retrofitting and upgrading existing KNX systems. The KNX radio wall transmitter is perfectly suited for structural conditions where bus lines cannot or should not be installed. This allows the particularly flat devices to be flexibly placed in the room, as they are simply glued on - be it plaster, wood or glass. The room functions can be

conveniently controlled by a simple touch of a button. KNX hand-held transmitters are available as an alternative to the wall transmitters. Addressing, parameterization and diagnostics are carried out via the KNX radio USB stick or alternatively via the KNX data interface. The bidirectional connection of KNX RF and wired KNX TP takes place via JUNG radio converter.

KNX RF RADIO WALL TRANSMITTER F 40

Ref.-no.

KNX RF radio transmitter modules F 50**Intended use**

- Radio operation of loads, e.g. light on/off, dimming, Venetian blinds up/down, brightness values, calling up and saving light scenes
- Operation in cabled KNX systems via radio converter (ref.-no.: MK 100 RF)
- Mounting on appliance box according to DIN 49073, screw fixing on walls or adhesive fixing on smooth, even surfaces (glass)

Product characteristics

- Push-button functions for switching, dimming, blinds control, valuator, light scenes, etc.
- Button pairs for push-button function or rocker function
- Status indication with LED
- Integrated temperature sensor
- Battery-powered device (battery compartment accessible from front)

Technical data

Rated voltage:	DC 3 V
Battery type:	1 x lithium CR 2450 (included)
Ambient temperature:	-5 ... +45 °C
Radio frequency:	868.0 ... 868.6 MHz
Transmitting power:	max. 20 mW
Transmission range in free field:	typical 100 m

Transmission range in free field:	typical 100 m

KNX RF radio converter

Project design and commissioning with ETS5 or a more recent version.

MK 100 RF**Intended use**

- Connection of KNX radio networks with cabled KNX lines
- Extension of the radio range in KNX radio networks (repeater operation, external power supply with 24 V AC/DC, e.g. ref.-no. NT 2415 REG VDC)
- Installation in wall box according to DIN 49073 with suitable cover

KNX ROTARY SENSOR
LS 990 in chrome

Rotary sensor

While the operation is also performed like a classic rotary dimmer, the functionality for the KNX rotary sensor is much more extensive. The room functions and scenes are controlled here according to the proven „turn and press“ principle. It also harmonises perfectly with the rest of the components in the JUNG design.

Intuitive operating concept

Lighting control

Blind control

Music control

Temperature / climate control

FUNCTIONALITY

The KNX rotary sensor is used for controlling dimming, switching, and blind actuators as well as for the setpoint shift of a temperature controller. It has two red status LEDs for orientation.

Turn

Press

OPERATION

The rotary sensor is innovative because it implements an operating concept that has never before existed in this form in the KNX system. The well-known function of a rotary dimmer was used as template. The rotary sensor operates according to the same principle and also has

three extension inputs to connect conventional, floating contacts of switches, buttons and magnetic contacts. These combination possibilities extend the range of functions many times over. Labelling using the Graphic Tool further optimises the handling.

Combination possibilities using satellites

One press of the button activates the programmed light scenario, that includes several lights in the living room, for example. All luminaires can be dimmed together using the KNX rotary sensor.

All three binary inputs of the rotary sensor are used here: Activate lighting scenes via the connected push-button, dim all connected luminaires together with the rotary sensor and also move the shutters up and down using the blind push-buttons.

The Hi-Fi system is switched on and the volume controlled with the rotary sensor. The floor lamp is controlled in parallel using the serial button. The push-button connected to the third extension input functions as energy-saving button: Pressing this disconnects the current for the connected users and they do not drop into the energy-consuming standby mode.

Ref.-no.

**Rotary sensor
with integrated BCU
with integrated push-button interface 3-gang
with push-button function and acoustic signal**

Function: switching, dimming, shutter control, value transmitter, scene extension

DS 4092 TS**Intended use**

- Operation of loads, e.g. light on/off, dimming, blinds up/down, brightness values, temperatures, calling up and saving light scenes, etc.
- Installation in wall box according to DIN 49073

Product characteristics

- Operation by turning or pressing the control button
- Integrated push-button interface: Three binary inputs for potential-free contacts
- Functions for control button and push-button interface: Switching, dimming, shutter control, value transmitters, calling up scenes, etc.
- Two red status LEDs
- Acoustic signal transmitter, e.g. for status, operation or alarm message, ringtone or audible alert
- Alarm function, optional with confirmation by pressing
- Convenience function for dimming and value adjustment: Preselection of the increment by fast turning
- Energy saving mode
- Separated locking functions for control button and push-button interface

Push-button BCU

Operating KNX in conventional design: The push-buttons with integrated BCU (integrated bus coupling unit) are the same in design and handling as conventional buttons; however, they have the variety of functions of a smart KNX sensor.

PUSH-BUTTON BCU
LS 990 in aluminium

Variety of designs

Attractive appearance for the BCU push-buttons with the AS, A, CD and LS ranges. Form, material and variety of colours determine the JUNG design. They harmoniously blend in to the remaining electrical installation.

Designs and operation

The push-button BCUs are available in four versions depending on the application. The desired parameters can be programmed using the ETS software. The devices with neutral position have a multiple function capability by operating the rocker „up“ and „down“. Two single-colour LEDs are used for floor pilot lighting or for status display and can also be set using parameters.

- L Laser labelling possible

Ref.-no.

Depending on the version of the push-button BCU – 1-gang rocker or 2-gang rocker – centre plates are used with and without indication lights.

The “upper” or “lower” rockers can be controlled with the push-button with “neutral position”, while only the “lower” rocker can be pressed with the push-button with “switch position”. The push-button BCU can only function with an application program i.e. the push-button BCU consists of the device (hardware) and the application program (software).

Push-button BCU, neutral position

Function: switching, dimming, shutter control
LED: always ON, always OFF, status indication

1-gang **4071.02 LED**

Status indication is possible with LED

Push-button BCU, switch position

Function: switching, dimming
LED: always ON, always OFF

Can be converted into pull cord push-button by means of pull cord insert ref.-no. 34 KO5 and rocker with lens.

1-gang **4071.01 LED**

Status indication is possible with LED

Ref.-no.

Depending on the version of the push-button BCU – 1-gang rocker or 2-gang rocker – centre plates are used with and without indication lights.

The “upper” or “lower” rockers can be controlled with the push-button with “neutral position”, while only the “lower” rocker can be pressed with the push-button with “switch position”. The push-button BCU can only function with an application program i.e. the push-button BCU consists of the device (hardware) and the application program (software).

Presence Detector Mini

**KNX PRESENCE DETECTOR MINI**

Available in the Standard and Universal versions

Unobtrusive, compact, precise: the KNX Presence Detector Mini is all of these. It is designed to control lighting systems, room thermostats, and other electrical loads as needed. The striking feature is its compact design with three ceiling mounting options: Depending on the particular room situation, the unit may be installed in a false ceiling, on the surface, or in a commercial flush wall box.

Three mounting types

FALSE CEILING

The most discreet installation type is clip-on mounting in a false ceiling. The spring clips ensure reliable fixing of the unit, and only the lens and the narrow design ring can be seen from below.

FLUSH MOUNTING

Flush-mounted installation of the presence detector mini or the brightness sensor is carried out by means of a separate flush mounting set in an off-the-shelf DIN 49073 flush wall box.

SURFACE MOUNTING

The third type of ceiling installation is the surface-mounted option. JUNG also provides a separate set for this that also includes a bezel as well as a surface cap for harmonious appearance.

BRIGHTNESS SENSOR

The KNX brightness controller with integrated brightness sensor is structurally identical to the Presence Detector Mini. This performs the interior lighting control depending on the amount of daylight present. This has the same installation options as for the Presence Detector Mini. The brightness sensor with its harmonious proportions and the „invisible“ adjustment elements has an unobtrusive design.

 Protection level IP 44 ensured

Ref.-no.

**Presence detector mini
with integrated BCU**

ETS product family: Physical sensors
Product type: Movement

Standard

white  **3361 M WW**

Universal

white  **3361-1 M WW**

Intended use

- Requirement-oriented control of lighting, room thermostats and other electrical consumers in interior rooms
- Clamp mounting in suspended ceilings
- Ceiling mounting on fixed ceilings in flush-mounted box according to DIN 49073 (with flush mounting set, ref.-no.: PMM-UP-SET-WW) or in surface-mounted housing (surface mounting set, ref.-no.: PMM-AP-SET-WW)

Product characteristics

- Integrated bus coupling unit
- 3 PIR sensors
- Detection field 360°
- Integrated brightness sensor
- Deployed as presence detector, motion detector, or for alert operation
- Output functions: Switching, staircase function, switching with forced position, value transmitter, light scene extension, operating mode setting for room temperature controller
- Detection area extendible by parallel switching of several devices as main unit or extension unit
- Manual sensitivity adjustment
- Status LED: Flashes during motion detection; depending on programming in normal operation or only during the walking test mode

Additional characteristics of "Universal" version:

- Manual operation with IR remote control possible (ref.-no.: KNX PM FB IR)
- 5 function blocks for motion or presence detection each with 2 outputs
- Function blocks switchable, e.g. for day/night operation
- PIR sensors can be evaluated separately
- Brightness sensor function with 3 limiting values
- Light control with max. 3 channels, setpoint shift in operation, separate configuration of dimming-up, control and dimming-down phase
- Light control can be combined with presence detector function

Presence detector function:

- Detection of the smallest motions e.g. at a workplace for detecting the presence of persons
- Switch on: Motion detection and brightness threshold not reached
- Switch off: No motion in the detection field and shut-off delay elapsed or brightness threshold exceeded

Motion detector function:

- Motion detection for passageways in buildings
- Switch on: Motion detection and brightness threshold not reached
- Switch off: No motion in the detection field and shut-off delay elapsed

After reacting and switching on, the motion detection works independently of the brightness.

Signalling mode:

- Brightness-independent detection of motions in the detection field
- Switch on: After detection of an adjustable number of motions within the set monitoring period
- Switch off: No persons in the detection field and shut-off delay elapsed

PMM-AP-SET-WW

Presence detector / ceiling observer

This presence detector / ceiling observer is reliable. even when great height is a problem. When installed in heights of up to 5 m, the unit registers everything that is moving within a diameter of approx. 20 m. The detection angle of 360° may be divided into three sensor segments of 120° each that may be enabled individually.

DETECTION FIELD

The presence detector / ceiling observer has an especially homogeneous detection area of around 20 m (when installed at a height of 5 m). This allows precise motion detection in large rooms as well.

RANGE

The 360° detection angle can be divided into three separate 120° portions that can be enabled individually by the relevant one of the three PIR sensors.

These sensors can also be evaluated individually by software so that the “viewing direction” of the sensors can be modified using parameters (Universal version).

There are Standard and Universal versions of the presence detector / ceiling observer. In addition to presence-dependent constant light regulation, the Universal model also has five function blocks that operate independently of each other and to which the three PIR sensors can be assigned. Each functional block may be configured as desired for the presence detector, ceiling observer, or signalling applications.

For example, using KNX commands, the blocks can be switched to the respective required application, depending on the time of day and use. The unit may be optionally set up and operated using an IR remote control.

Tip for installation in gymnasiums: The presence detector may optionally be fitted with a protective basket made of solid steel. Thus, it will be effectively protected against damage by thrown balls.

KNX AUTOMATIC SWITCH
in the 1.10 m and 2.20 m versions

Automatic switch

KNX AUTOMATIC SWITCH 1.10 M

KNX AUTOMATIC SWITCH 2.20 M

IMPROVED DETECTION CHARACTERISTICS, EXTENDED FUNCTIONALITY

The 180° detection range is monitored by two PIR sensors that can be used individually or together. In this way, difficult room situations can also be optimally covered, such as small rooms or stairways. In this respect they are to be used as movement detectors in corridors and passages. On the other hand, as “observer with switch-off brightness”, they are outstanding in use, for example, in offices.

The software for the automatic switch is matched with respect to its important parameters to the JUNG KNX presence detectors, which allows simple initial start-up.

New performance characteristic: the integrated temperature sensor. The actual room temperature is measured with this. It can be reported to various KNX devices for heating regulation and air conditioning.

Ref.-no.

Bus coupling unit 3

screw fixing only, without claws

2073 U

Intended use

- Coupling of automatic switches (ref.-no.: ..3181.., ..3281..) to KNX systems
- Installation in flush-box according to DIN 49073

Technical data

KNX medium:	TP 256
Rated voltage KNX:	DC 21 ... 32 V SELV
Ambient temperature:	-25 ... +55 °C
Storage/transport temperature:	-25 ... +70 °C
Protection class:	III

Automatic switch 1.1 m

for bus coupling unit 3 ref.-no.: 2073 U

ETS product family: Physical sensors

Product type: Movement

Intended use

- Requirement-oriented control of lighting and other electrical loads in interior rooms
- Mounting on bus coupling unit 3 (ref.-no.: 2073 U)

Product characteristics

- Automatic switching of lighting depending on the thermal movement and ambient brightness
- 2 PIR sensors
- Detection range 180°
- Integrated brightness sensor
- Switch-off brightness can be set
- Output functions: switching, value transmitter, light scene extension, staircase function, switching with forced position, operating mode setting for room temperature controller
- Extension of the detection area by way of operating several devices as main unit or extension unit
- Sensitivity can be set manually
- Status LEDs
- Manual switching on the device
- Up to half of the detection area can be screened off (cover or parameter setting)

Additional characteristics of "Universal" version:

- Manual operation with IR remote control possible (ref.-no.: KNX PM FB IR)
- 5 function blocks for motion detection each with 2 outputs
- Function blocks switchable, e.g. for day/night operation
- Brightness sensor function with 3 limiting values
- Alarm message in case the device is removed from the bus coupling unit
- Temperature measurement

KNX ROOM THERMOSTAT FAN COIL

Consistent JUNG design also in the KNX temperature and ventilation control: The different room thermostats provide a healthy room climate in private and commercial buildings. Well thought out operating concepts support the intuitive handling in each case.

Room thermostat

ROOM TEMPERATURE CONTROLLER

Standalone solution for heating and cooling for the residential and commercial areas. It is also possible to interrogate conventional push-buttons and/or window and door contacts as well as dew/condensation and leak sensors.

ROOM AUTOSTAT

Has no setting wheel and thus cannot be manipulated and therefore ideal for use in public buildings; the KNX room autostat with integrated push-button interface, 4-gang for convenient temperature control.

CLIMATE SENSOR

For automated ventilation applications and/or for temperature control. Also possible: Interrogation of conventional push-buttons and/or window and door contacts as well as dew/condensation and leak sensors.

ROOM TEMPERATURE CONTROLLER F 50

Controller for heating/cooling with integrated fan coil actuation. With variable display and operation options; self-explanatory symbols and coloured status and operation LEDs optimise the operation.

ROOM THERMOSTAT FAN COIL

Controller for temperature and ventilation, mainly for the hotel business. Intuitive operating concept using capacitive sensor push-buttons. Clear display and unambiguous symbols make the selection from four operating modes easy.

Room Temperature Controller F 50 options

OFFICE APPLICATION EXAMPLES

PUSH-BUTTON EXTENSION MODULE FOR ROOM TEMPERATURE CONTROLLER F 50

The functions can be extended by connecting the 1- to 4-gang push-button extension module, while at the same time minimising the load on the bus. Particularly the option for installation of the extension module at a distance of up to 30 m provides more flexibility.

Display and adjustment of the operating mode The temperature mode is selected as required using the "Comfort", "Standby", "Night Operation" and "Frost Protection" operating modes.

PRESENCE BUTTON

The user can decide between presence and absence with the Presence button. The appropriate symbols and coloured LEDs display the current status.

STANDBY/NIGHT OPERATION

At times of absence a choice between the 'frost protection' and 'night reduction' operation modes can be made. Coloured LEDs next to the symbols indicate the relevant mode.

MOVE BLINDS/SHUTTERS

Push-button sensor functions can be individually parametrised. Here, the operating mode changeover is changed to the "move blinds/shutters" push-button function.

SWITCH/DIM

The "switch/dim" push-button functions on one side have been combined with temperature setpoint shift on the other side for this parametrisation.

Ref.-no.

Temperature controller fan coil**Intended use**

- Sensor module for operating electrical fan coil units in KNX installations
- Measurement and feedback control of the room temperature
- Installation in flush-box according to DIN 49073 (recommendation: deep box)

Product characteristics

- Real glass front panel
- 8 capacitive sensor buttons
- Internal temperature sensor
- External temperature sensor can be evaluated
- Control of fan coil units
- Heating and/or cooling mode
- Suitable for 2-pipe or 4-pipe systems
- Up to 3 fan speeds can be controlled
- Room temperature controller function
- Preselection of the current energy level either through the option of 4 operating modes in accordance with KNX standard or of 5 temperature profiles for use in hotels or similar sites
- Display for indication of temperature (°C or °F), fan speed, operating mode/profile
- 1 operating level and 2 menu levels
- Menu levels blockable
- 1 status LED (red/green/blue)
- Brightness and contrast adjustable
- Duration of the display illumination up to 120 seconds
- Operation as extension unit for temperature controller possible
- Integrated bus coupling unit

Technical data

KNX medium:	TP 256
Rated voltage KNX:	DC 21 ... 32 V SELV
Current consumption KNX:	8 ... 17.5 mA
Protection class:	III
Ambient temperature:	-5 ... +45 °C
Storage/transport temperature:	-20 ... +70 °C

Room temperature controller module 2-gang

including transparent cover and inlay with symbols

Intended use

- Single-room temperature control in KNX installations
- Operation of loads, e.g. light on/off, dimming, blinds up/down, recalling and saving light scenes, etc.
- Installation in wall box according to DIN 49073

Product characteristics

All buttons can be assigned with push-button sensor functions or functions for controller operation.

- Measurement of the room temperature
- Room temperature control with setpoint value specification
- Extension for room temperature controller
- Push-button functions switching, dimming, blind control, value transmitter, scene recall, etc.
- One or two functions per button
- Completion with cover kit 2-gang
- Illuminable inscription field
- Two red status LEDs per button – red, green or blue adjustable
- One operation LED as an orientation light and to indicate the programming status – red, green or blue adjustable
- Brightness of status LED, operation LED and labelling field adjustable; switchable while in operation, e.g. during the night
- Disabling function: Disable or function switch-over of all or of individual push-button functions
- Alarm function, optionally with confirmation by pressing any button
- Energy saving mode (for operation without controller function)
- Integrated bus coupling unit
- Connection for a push-button extension module, for extension with up to eight additional buttons

for AS and A ranges

for cover kit 2-gang, complete, ref.-no.: A 502 TSA ..

**Room temperature controller
with integrated BCU
with rotary knob for set point adjustment**

Only with the ETS 3.0d version or later versions the full functionality will be available.

Intended use

- Single-room temperature control in KNX installations
- Installation in appliance box according to DIN 49073

Product characteristics

- Measurement of room temperature and comparison with setpoint temperature
- Setpoint specification by selection of the operating mode
- Operating modes: Comfort, Standby, Night operation, Frost/heat protection
- Heating and cooling mode
- Heating and cooling with basic and additional step
- Setpoint adjustment
- Presence push-button
- Status LEDs

**CO₂ multi-sensor
with integrated BCU
with humidity sensor and room temperature controller
with integrated push-button interface 2-gang**

Intended use

- Measurement of CO₂ concentration, relative air humidity and air temperature
- Output of the measured values as telegram to the bus, e.g. for controlling fans or window drives via KNX telegrams
- Single-room temperature control in KNX installations
- Installation in appliance box according to DIN 49073

Product characteristics

- Limit value monitoring for CO₂ concentration (max. 4 threshold values) and air humidity (max. 2 threshold values)
- Dew point alarm e.g. for cooling blankets and conservatories, to avoid mould formation
- Two binary inputs for connection of floating contacts e.g. buttons, switches, window contacts
- Logic gates for simple gating functions

Technical data

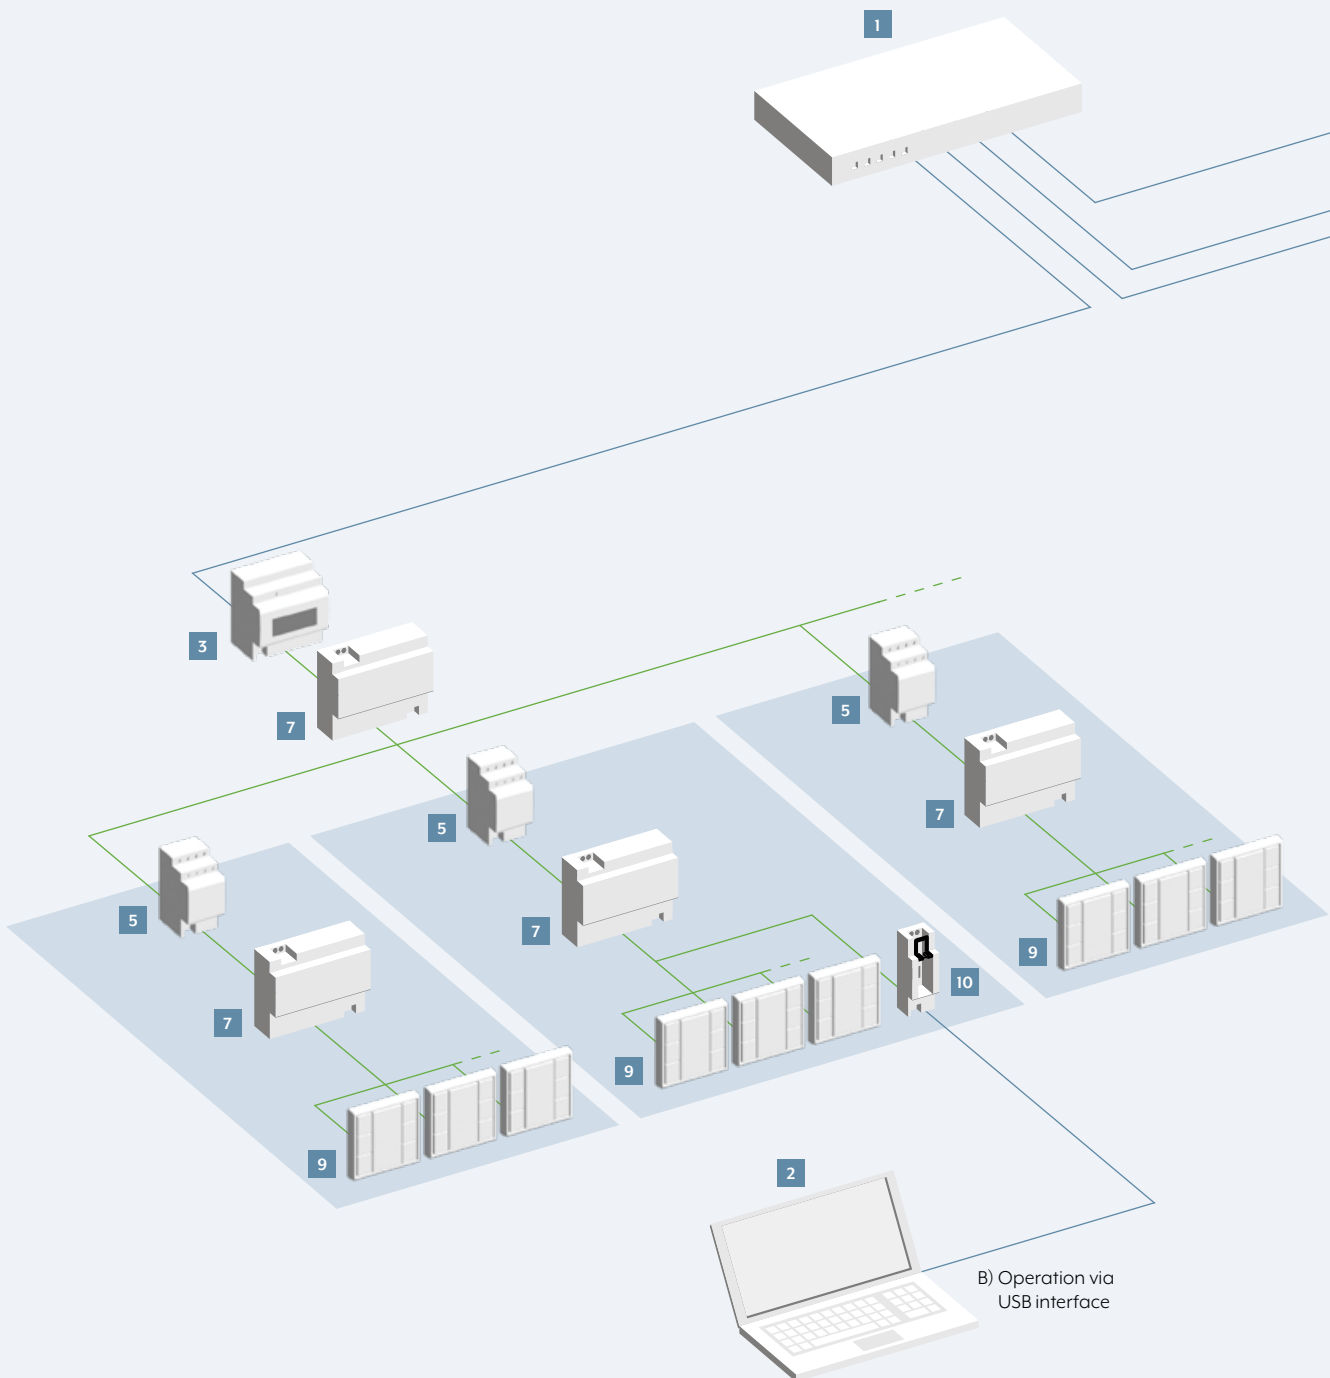

Rated voltage KNX:	DC 21 ... 32 V SELV

System design

Overview: The example design of a KNX installation with the individual system devices – including the various options of transmission paths and types of programming access.

Ref.-no.

Power supplies**Intended use**

- Supplying KNX devices with bus voltage
- Supplying devices with direct current
- Mounting on DIN rail according to EN 60715 in distribution boxes

Product characteristics

- Output with integrated choke for supplying KNX bus lines
- Output DC 30 V for supplying additional devices
- Nominal current can be subdivided to outputs as desired
- Reset button
- Short-circuit proof
- Overvoltage proof
- No-load protection
- Suitable for operation in systems with emergency power supply
- Potential-free signal contact for operating and diagnostic message
- With identical power supply parallel switchable
(until the maximum short-circuit current is reached)

Power supply, 160 mA

Rail mounting device, 4 rail units

ETS product family: System components

Product type: Power supply

20160 REG**Technical data**

Rated voltage AC:	AC 180 ... 264 V ~
Mains frequency:	50 / 60 Hz max. 1.5 W
Efficiency:	approx. 76 %
Rated voltage DC:	DC 240 ... 250 V
KNX	
KNX medium:	TP 256
Bus output voltage:	DC 28 ... 31 V SELV
Output current:	160 mA (all outputs)
Short-circuit current:	max. 1 A
Parallel operation with additional power supply:	yes
Signal output	
Switching voltage AC:	AC 12 ... 230 V ~
Switching voltage DC:	DC 2 ... 30 V
Switching current:	5 mA ... 2 A
Ambient temperature:	-5 ... +45 °C
Storage/transport temperature:	-25 ... +75 °C
Relative humidity:	max. 93 % (no condensation)
Mounting width:	72 mm (4 rail units)

Ref.-no.

Power supply, 320 mA

Rail mounting device, 4 rail units

ETS product family: System components

Product type: Power supply

20320 REG**Technical data**

Rated voltage AC:	AC 180 ... 264 V ~
Mains frequency:	50 / 60 Hz
	max. 1.8 W
Efficiency:	approx. 84 %
Rated voltage DC:	DC 240 ... 250 V
KNX	
KNX medium:	TP 256
Bus output voltage:	DC 28 ... 31 V SELV
Output current:	320 mA (all outputs)
Short-circuit current:	max. 1 A
Parallel operation with additional power supply:	yes
Signal output	
Switching voltage AC:	AC 12 ... 230 V ~
Switching voltage DC:	DC 2 ... 30 V
Switching current:	5 mA ... 2 A
Ambient temperature:	-5 ... +45 °C
Storage/transport temperature:	-25 ... +75 °C
Relative humidity:	max. 93 % (no condensation)
Mounting width:	72 mm (4 rail units)

Power supply, 640 mA

Rail mounting device, 4 rail units

ETS product family: System components

Product type: Power supply

20640 REG**Technical data**

Rated voltage AC:	AC 180 ... 264 V ~
Mains frequency:	50 / 60 Hz
	max. 2.9 W
Efficiency:	approx. 87 %
Rated voltage DC:	DC 240 ... 250 V
KNX	
KNX medium:	TP 256
Bus output voltage:	DC 28 ... 31 V SELV
Output current:	640 mA (all outputs)
Short-circuit current:	max. 1.5 A
Parallel operation with additional power supply:	yes
Signal output	
Switching voltage AC:	AC 12 ... 230 V ~
Switching voltage DC:	DC 2 ... 30 V
Switching current:	5 mA ... 2 A
Ambient temperature:	-5 ... +45 °C
Storage/transport temperature:	-25 ... +75 °C
Relative humidity:	max. 93 % (no condensation)
Mounting width:	72 mm (4 rail units)

Ref.-no.

Power supply, 1280 mA

Rail mounting device, 6 rail units

ETS product family: System components

Product type: Power supply

21280 REG**Technical data**

Rated voltage AC:	AC 180 ... 264 V ~
Mains frequency:	50 / 60 Hz max. 6.4 W
Efficiency:	approx. 86 %
Rated voltage DC:	DC 240 ... 250 V
KNX	
KNX medium:	TP 256
Bus output voltage:	DC 28 ... 31 V SELV
Output current:	1280 mA (all outputs)
Short-circuit current:	max. 3 A
Parallel operation with additional power supply:	no
Signal output	
Switching voltage AC:	AC 12 ... 230 V ~
Switching voltage DC:	DC 2 ... 30 V
Switching current:	5 mA ... 2 A
Ambient temperature:	-5 ... +45 °C
Storage/transport temperature:	-25 ... +75 °C
Relative humidity:	max. 93 % (no condensation)
Mounting width:	108 mm (6 rail units)

Ref.-no.

**Uninterruptible KNX power supply 640 mA
with integrated choke**

Rail mounting device, 8 rail units

ETS product family: System components

Product type: Power supply

USV 640 MA**Product characteristics**

- Generation and monitoring of the KNX bus voltage
- With lead gel battery (ref.-no. BGA 12 AH) and cable set (ref.-no. KSB 4, KSE 2): buffering of the KNX bus voltage in the event of mains failure
- Up to 2 batteries can be connected
- Short-circuit proof
- Overvoltage proof
- Integrated choke
- Alarm contact for fault message

Technical data

Power supply

Rated voltage:	AC 195 ... 255 V ~
Rated frequency:	45 ... 65 Hz
Power consumption:	max. 50 VA
Power loss:	max. 10 W
Ambient temperature:	-5 ... +45 °C
Storage/transport temperature:	-25 ... +70 °C (Storage above +45 °C reduces the lifetime)

KNX

Bus output voltage:	DC 28 ... 31 V SELV
Output current:	640 mA (short-circuit proof)
Short-circuit current:	max. 1.4 A
Connection:	terminal

Connection of fault indicator

Switching voltage AC:	AC 12 ... 230 V ~
Switching voltage DC:	DC 12 ... 24 V
Switching current AC:	max. 6 A
Switching current DC:	max. 4 A

Battery connection

Cable length:	approx. 2 m
Fine-wire fuse:	T 6.3 A H 250 V
Rated voltage:	DC 12 V
Rated charging current:	650 mA, at battery capacity > 5 Ah 150 mA, at battery capacity < 5 Ah

Mains failure bridging time
(battery like new)

1 battery 12 V / 12 Ah:	approx. 5.5 h
2 batteries 12 V / 12 Ah:	approx. 11 h

Mounting width: 144 mm (8 rail units)

Terminals:	screw terminals
single wire:	0.5 ... 4 mm ²
stranded with ferrule:	0.2 ... 2.5 mm ²

Ref.-no.

Lead gel battery (rechargeable)

BGA 12 AH

12 V DC, 12 Ah

In combination with the uninterruptible KNX power supply, the lead gel battery serves for the buffering of the system voltage. Max. two lead gel batteries can be connected in parallel to the power supply.

In that case two equal lead gel batteries must be used. For the connection of a single battery the 4-wire cable set must be used, for the connection of two batteries the 4-wire cable set must be used for the first one, the second one must be connected with the 2-wire cable set.

The durability of lead gel batteries is up to 5 years.

Technical data

Power supply

Rated voltage: 12 V DC

Battery capacity: 12 Ah

Dimensions (W x H x D): 151 x 94 x 98 mm

Weight: 4.2 kg

Ambient temperature

Operation: -20 ... +50 °C

Cable set

Basis

KSB 4

Extension

KSE 2

For the connection of the uninterruptible KNX power supply and the lead gel battery the 4-wire cable set (for one battery) must be used. For two batteries the 4-wire and the 2-wire set must be used.

The 4-wire cable set has an integrated fuse and a temperature sensor, the 2-wire cable set has only an integrated fuse.

Technical data KSB 4

Cable

Wires: 4-wire cable

Cross-section: 0.75 mm²

Length: 2 m

Colour battery connection: red: positive (12 V battery)
black: negative (GND battery)

Colour temperature sensor: white: positive (12 V temp. sensor)
yellow: negative (GND temp. sensor)

Terminals

Battery connection: for the connection to the uninterruptible power supply: ferrules
for the connection to the battery: cable lug (6.3 x 0.8 mm)

Temperature sensor: ferrules

Fuse, model: exchangeable fuse with in-line fuse holder (screw cap)

Fuse, type: 5 x 20 mm, T6.3 H 250 V

Technical data KSE 2

Cable

Wires: 2-wire cable

Cross-section: 0.75 mm²

Length: 2 m

Colour battery connection: red: positive (12 V battery)
black: negative (GND battery)

Terminals

Battery connection: for the connection to the uninterruptible power supply: ferrules

for the connection to the battery: cable lug (6.3 x 0.8 mm)

Fuse, model: exchangeable fuse with in-line fuse holder (screw cap)

Fuse, type: 5 x 20 mm, T6.3 H 250 V

Ref.-no.

USB data interface

Rail mounting device, 2 rail units

2130 USB REG

The USB data interface enables the coupling of a PC for the addressing, programming and diagnoses of KNX components. The power is fully supplied by the connected PC via the USB interface.

This means that the USB data interface is no longer connected for the KNX if the USB cable is not plugged in. The device is only programmed locally with a physical address via the connected PC and therefore does not have a programming button or programming LED. The firmware of the USB data interface can be updated via a PC and is therefore safeguarded for future standards.

Note: The USB data interface is supported by ETS 3 software from version "a" upwards and by the PC operating systems Windows XP and Windows 7.

Connection: The connection to the KNX is carried out with the aid of the bus connecting terminal. The USB connection is carried out with a certified USB cable (1 x B plug required) with a max. length of 5 m.

Technical data

Power supply:	via USB port of the PC
Connection	
KNX:	KNX bus connection block
USB port:	USB socket, type B
Transfer rate:	9600 Baud
Transmission protocol:	compatible with USB 1.1/2.0
Length of USB cable:	max. 5 m
Ambient temperature:	-5 ... +45 °C
Storing temperature:	-25 ... +70 °C
Protection class:	II
Mounting width:	36 mm (2 rail units)

KNX RF radio USB stick**USB 2130 RF****Intended use**

- PC interface for the addressing, programming and diagnostics of KNX-RF devices
- USB stick for coupling to a PC with a Windows-based operating system

Product characteristics

- Commissioning, programming, visualisation and diagnostics of KNX-RF devices
- Automatic installation of PC communication via HID profile

Technical data

Rated voltage:	DC 5 V
USB version:	2.0
Connection USB:	type A
Ambient temperature:	-10 ... +70 °C
Relative humidity:	max. 80 % (no condensation)
Radio frequency:	868.0 ... 868.6 MHz
Transmitting power:	max. 20 mW
Transmission range in free field:	typical 100 m

KNX RF radio converter

Project design and commissioning with ETS5 or a more recent version.

MK 100 RF**Intended use**

- Connection of KNX radio networks with cabled KNX lines
- Extension of the radio range in KNX radio networks (repeater operation, external power supply with 24 V AC/DC, e.g. ref.-no. NT 2415 REG VDC)
- Installation in wall box according to DIN 49073 with suitable cover

Ref.-no.

IP interface

Rail mounting device, 3 rail units

IPS 200 REG**Intended use**

- Connection between KNX devices and PC or other data processing devices via IP
- Operation as data interface
- Mounting on DIN rail in distribution boxes

Product characteristics

- LED display for KNX communication, Ethernet communication and programming mode
- Configuration via ETS, Telnet or software tool
- Max. 5 connections to IP terminal devices, e.g. for simultaneous visualisation and configuration
- Supply from network line (Power-over-Ethernet acc. to IEEE 802.3af) through separate voltage supply ref.-no. NT 2415 REG VDC or the auxiliary voltage output of the KNX voltage supply
- Electrical isolation between KNX and IP network
- Power consumption max. 1 W

IP router

Rail mounting device, 3 rail units

ETS product family: System components

Product type: IP router

IPR 200 REG**Intended use**

- Connection between KNX devices and PC or other data processing devices via IP
- Operation as line/area coupler or data interface
- Mounting on DIN rail in distribution boxes

Product characteristics

- KNXnet/IP routing for communication between KNX lines, areas and systems via IP network
- Telegramm forwarding and filtering according to physical address or group address
- LED display for KNX communication, Ethernet communication and programming mode
- Configuration via ETS and Telnet
- SNTP server, with battery backup
- Commissioning with display support
- Max. 5 connections to IP terminal devices, e.g. for simultaneous visualisation and configuration
- Outage message of the KNX system to the IP system
- Supply from network line (Power-over-Ethernet acc. to IEEE 802.3af) through separate voltage supply ref.-no. NT 2415 REG VDC or the auxiliary voltage output of the KNX voltage supply
- Electrical isolation between KNX and IP network
- Power consumption max. 1 W

Power supply for rail mounting

for Smart Control ref.-no.: SC 7 AL, SC 7 SW, SC 10, SC 15, SC 19

for IP interface ref.-no.: IPS 200 REG and IP router ref.-no.: IPR 200 REG

Rail mounting device, 4 rail units

NT 2415 REG VDC**Technical data**

Input voltage:	AC 100 ... 240 V ~, 50/60 Hz
Input current:	730 mA
Output voltage:	24 V DC
Output current:	1.5 A
Mounting width:	72 mm (4 rail units)
Connection:	screw terminals

 Product type: Line coupler

2142 REG

Function: The coupler connects two KNX data lines and ensures the electrical separation of these lines from one another. The definite functions of the device are defined by addressing and parameterization.

Line coupler: Connection of a line with a main line. Alternatively with or without filter function. The coupler belongs logically to the subordinate line (here: line).

Area coupler: Connection of a main line and an area line. Alternatively with or without filter function. The coupler belongs logically to the subordinate line (here: main line).

Amplifier: Preparation and repetition of telegrams on a line, no filter function. Division of a line into max. 4 independent line segments (max. 3 line amplifiers connected in parallel per line). Each line segment requires a separate power supply including a choke.

When using the device as an area/line coupler with the application coupler/amplifier 901011, the telegram confirmation can be parameterised additionally on "always reject" (NACK) on a line. With this parameter setting a physical access (programming/commissioning) from this line to the coupler and the other lines is no longer possible (protective function).

Technical data

Power supply:	21 ... 32 V DC from superordinate line
Current consumption	
superordinate line:	approx. 6 mA
subordinate line:	approx. 8 mA
Connection:	KNX bus connection block for superordinate and subordinate line
Mounting:	on DIN rail
Ambient temperature:	-5 ... +45 °C
Storing temperature:	-25 ... +70 °C
Protection class:	III acc. EN 61 140
Mounting width:	36 mm (2 rail units)

Application unit logic

Rail mounting device, 2 rail units
 ETS product family: Controller
 Product type: Controller

ABL/S2.1**Product characteristics**

- Can be parameterised via ETS3
 The latest .NET Framework is required.
- 50 logical functions (AND, OR, One hot)
- 50 unidirectional and bidirectional gates
- 30 timers (with ON/OFF delay, pulse duration, staircase lighting function)
- 10 comparators

KNX DALI-Gateway TW

Illuminate rooms in a targeted manner and use matching colour temperatures to promote performance of people. The KNX DALI gateway TW forms the interface to the control of DALI luminaires in a KNX installation (for max. 64 DALI nodes in max. 32 groups). As well as the regular brightness control, the control of the colour temperature of white light is also performed. The lighting can thus be adjusted as required at any time.

The basic idea of Tunable White is to control the colour temperature dynamically and seamlessly from warm white (1,000 Kelvin) to cold white (10,000 Kelvin). By adapting the colour temperature to the room, the perceived quality improves. Thanks to its very good colour rendering, Tunable White stands for

a high level of lighting comfort – but also mainly for its ability to adapt artificial light dynamically to human biorhythms. This can probably improve human performance and have a positive effect on their health. The JUNG KNX DALI gateway TW is the first KNX device that offers this capability with such scope.

COLOUR TEMPERATURE AND BRIGHTNESS

Using the KNX DALI Gateway TW, colour temperature and brightness can be set independently of each other or combined as desired. In this way, the behaviour of an incandescent lamp can be adjusted by changing the colour temperature to the warmer range when dimming and changing to the colder range when making brighter.

Ref.-no.

DALI gateway TW

Rail mounting device, 4 rail units
with manual electronic operation and LED status indication
ETS product family: Illumination
Product type: Dimmer

2099 REGHE

Intended use

- Controlling of luminaires and other applications with DALI operating device in KNX installations e.g. electronic ballast
- Mounting on DIN rail according to EN 60715 in distribution boxes

Product characteristics

- Control of up to 64 DALI devices in up to 32 groups
- Setting of colour temperature for luminaires with DALI Device Type 8 for tunable white acc. to IEC 62386-209
- Suitable for operation in emergency lighting systems
- Individual, group or central addressing
- 16 light scenes
- Effect control for dynamic lighting effects or colour games
- Read out DALI device state via KNX, e.g. brightness or luminaire error
- Manual operation of the DALI groups
- Restraint function
- Feedback of switching state and brightness value in bus and manual mode
- Collective feedback
- Central switching function
- Disabling function for each DALI group
- Separate ON and OFF delay
- Staircase lighting timer with pre-warning function
- Corridor function: when combined with motion detectors, reduced continuous lighting, if no motion is detected
- Online or offline project design of the DALI devices with ETS plug-in
- Short-circuit protection
- Surge voltage protection
- Overload protection
- Operating hours counter
- Signal of the global switching status of the DALI devices, e.g. to switch off the mains voltage of the DALI devices to avoid standby losses
- An individual DALI device can be exchanged during operation without software
- Linear or logarithmic dimming characteristic can be selected

Actuators for rail mounting

COMBINATION OF KNX ACTUATORS FOR RAIL MOUNTING

This combination of two 8-gang and 16-gang switch/blind actuators has the advantage of optimal use of space with 12 TE/24 channels and the resulting function depth.

The various KNX actuators for rail mounting are impressive due to high functionality in compact design, whereby the space in the distribution can be used optimally. Manual operability for „local operation“ and for maintenance purposes is common to all of them; also status feedbacks in manual mode. Scene operation is integrated in all switching, dimming and blind actuators.

The switching actuators are optionally available in the version with operating hours counter and current detection (measurement of the load current for each output). The JUNG KNX actuators for rail mounting also meet the applicable standards and established engineering practice of the VDE test and certification institute.

Breaking capacity DC 24 V:	6 A
Breaking capacity DC 48 V:	3 A
Min. switching current DC:	100 mA
Connection:	screw terminals
single wire:	0.5 ... 4 mm ²
stranded without ferrule:	0.5 ... 4 mm ²
stranded with ferrule:	0.5 ... 2.5 mm ²

Blinds actuator, 2-gang AC 110 – 230 V, 1-gang DC 12 – 48 V

Rail mounting device, 4 rail units
with manual electronic operation and LED status indication
Only with the ETS 3.0d version or later versions the full functionality will be available.
ETS product family: Shutter
Product type: Shutter

2502 REGHE**Technical data**

Outputs:	2 channels AC 110 ... 230 V, 1 channel DC 12 ... 48 V
Power supply mains:	AC 110 V (-10 %) ... 240 V (+10 %)
Mains frequency:	50 / 60 Hz
Connection:	screw terminals
single wire:	0.5 ... 4 mm ²
stranded without ferrule:	0.5 ... 4 mm ²
stranded with ferrule:	0.5 ... 2.5 mm ²
Breaking capacity AC1:	6 A (230 V)
Switching current DC 12/24 V:	6 A
Switching current DC 48 V:	3 A
Max. blind/shutter running time:	20 min
Power loss:	max. 4.5 W
Ambient temperature:	-5 ... +45 °C
Storing temperature:	-25 ... +70 °C
Approvals:	VDE

Ref.-no.

Blinds actuator, 4-gang AC 110 – 230 V, 2-gang DC 12 – 48 V

Rail mounting device, 4 rail units
 with manual electronic operation and LED status indication
 Only with the ETS 3.0d version or later versions the full functionality will be available.
 ETS product family: Shutter
 Product type: Shutter

2504 REGHE**Technical data**

Outputs:	4 channels AC 110 ... 230 V, 2 channels DC 12 ... 48 V
Power supply mains:	AC 110 V (-10 %) ... 240 V (+10 %)
Mains frequency:	50 / 60 Hz
Connection:	screw terminals
single wire:	0.5 ... 4 mm ²
stranded without ferrule:	0.5 ... 4 mm ²
stranded with ferrule:	0.5 ... 2.5 mm ²
Breaking capacity AC1:	6 A (230 V)
Switching current DC 12/24 V:	6 A
Switching current DC 48 V:	3 A
Max. blind/shutter running time:	20 min
Power loss:	max. 4.5 W
Ambient temperature:	-5 ... +45 °C
Storing temperature:	-25 ... +70 °C
Approvals:	VDE

Blinds actuator, 4-gang AC 110 – 230 V, 2-gang DC 12 – 48 V

Rail mounting device, 4 rail units
 with manual electronic operation and LED status indication
 Blind/shutter correction for lower end position (e.g. for ventilation position for roller blinds)
 Only with the ETS 3.0d version or later versions the full functionality will be available.
 ETS product family: Shutter
 Product type: Shutter

2514 REGHE**Technical data**

Outputs:	4 channels AC 110 ... 230 V, 2 channels DC 12 ... 48 V
Power supply mains:	AC 110 V (-10 %) ... 240 V (+10 %)
Mains frequency:	50 / 60 Hz
Connection:	screw terminals
single wire:	0.5 ... 4 mm ²
stranded without ferrule:	0.5 ... 4 mm ²
stranded with ferrule:	0.5 ... 2.5 mm ²
Breaking capacity AC1:	6 A (230 V)
Switching current DC 12/24 V:	6 A
Switching current DC 48 V:	3 A
Max. blind/shutter running time:	20 min
Power loss:	max. 4.5 W
Ambient temperature:	-5 ... +45 °C
Storing temperature:	-25 ... +70 °C
Approvals:	VDE

Ref.-no.

Blinds actuator, 8-gang AC 110 – 230 V, 4-gang DC 12 – 48 V

Rail mounting device, 8 rail units

with manual electronic operation and LED status indication

Only with the ETS 3.0d version or later versions the full functionality will be available.

ETS product family: Shutter

Product type: Shutter

2508 REGHE**Technical data**

Outputs:	8 channels AC 110 ... 230 V, 4 channels DC 12 ... 48 V
Power supply mains:	AC 110 V (-10 %) ... 240 V (+10 %)
Mains frequency:	50 / 60 Hz
Connection:	screw terminals
single wire:	0.5 ... 4 mm ²
stranded without ferrule:	0.5 ... 4 mm ²
stranded with ferrule:	0.5 ... 2.5 mm ²
Breaking capacity AC1:	6 A (230 V)
Switching current DC 12/24 V:	6 A
Switching current DC 48 V:	3 A
Max. blind/shutter running time:	20 min

Shutter actuator 4-gang AC 110 – 230 V

Rail mounting device, 4 rail units
with manual electronic operation and LED status indication
ETS product family: Shutter
Product type: Shutter

2504 REGHER**Product characteristics**

- Outputs can be operated manually, construction site mode
 - Blind/shutter position directly controllable
 - Acknowledgement of the blind/shutter position in bus and manual mode
 - Safety functions: 3 independent wind alarms, rain alarm, frost alarm
 - Integration into the temperature management of the building
 - Disabling of individual outputs manually or via bus
-
- No central function
 - No end position detection
 - No feedback for drive movement
 - No sun protection
 - No scene function
 - No forced position
 - No fabric-stretching

Technical data

Rated voltage:	AC 110 V (-10 %) ... 240 V (+10 %)
Mains frequency:	50 / 60 Hz
Switching voltage:	AC 250 V ~
Switching current AC 250 V:	6 A
Switching current DC 12/24 V:	6 A
Switching current DC 48 V:	3 A
Connection, power supply and load:	screw terminals
single wire:	0.5 ... 4 mm ²
stranded without ferrule:	0.5 ... 4 mm ²
stranded with ferrule:	0.5 ... 2.5 mm ²
Max. blind/shutter running time:	20 min
Mounting width:	72 mm (4 rail units)
Ambient temperature:	-5 ... +45 °C
Storage/transport temperature:	-25 ... +70 °C
Power loss:	max. 4.5 W
Rated voltage KNX:	DC 21 ... 32 V SELV
Power consumption KNX:	typical 150 mW
Connection, KNX:	terminal
Approvals:	VDE

Ref.-no.

LED universal dimming actuator / speed regulator, 1-gang

1 x 500 W, HV LED lamps typ. 3 ... 100 W

Rail mounting device, 4 rail units • ETS product family: Illumination • Product type: Dimmer

3901 REGHE**Intended use**

• Switching and dimming of incandescent lamps, HV halogen lamps, dimmable HV-LED lamps, dimmable compact fluorescent lamps, dimmable inductive transformers with LV halogen or LV LED lamps, dimmable electronic transformers with LV halogen or LV LED lamps • Mounting on DIN rail according to EN 60715 in distribution boxes • Speed controller for regulating the speed of single-phase motors e.g. induction motors, shaded pole motors or universal motors

Product characteristics

• Automatic or manual selection of the dimming principle suitable for the load • Protected against no-load, short-circuit and overheating • Signal in the event of a short-circuit • Outputs can be operated manually • Feedback of the switching position and the dimming value • Parameterisable switch-on and dimming behaviour • Time functions: switch-on delay, switch-off delay, staircase lighting timer with run-on time • Light scene operation • Disabling of individual outputs manually or by bus • Status indicator of the outputs via LED • Operating hours counter • Mains failure longer than approx. 5 seconds leads to switch-off of the dimmer actuator. Depending on the parameter setting, the connected load is calibrated after resumption of power supply.

Technical data

Rated voltage:	AC 110 ... 230 V ~, 50/60 Hz
Power loss:	max. 4 W
Stand-by power:	max. 0.5 W
Ambient temperature:	-5 ... +45 °C
Storage/transport temperature:	-25 ... +70 °C
Contact type:	ε, MOSFET

Motor loads

Motor switching current:	2.3 A
--------------------------	-------

Lamp loads

Connected load, 230 V per output

Incandescent lamps:	20 ... 500 W
HV halogen lamps:	20 ... 500 W
Inductive transformers:	20 ... 500 VA
Inductive transformers with LV-LED:	20 ... 100 VA
Electronic transformers:	20 ... 500 W
Electronic transformers with LV-LED:	20 ... 100 W
Dimmable HV LED lamps:	typical 3 ... 100 W
Dimmable compact fluorescent lamps:	typical 3 ... 100 W
Ohmic-inductive:	20 ... 500 VA
Ohmic-capacitive:	20 ... 500 W
Capacitive-inductive:	not permitted

Connected load, 110 V per output

Incandescent lamps:	20 ... 250 W
HV halogen lamps:	20 ... 250 W
Inductive transformers:	20 ... 250 VA
Inductive transformers with LV-LED:	20 ... 50 VA
Electronic transformers:	20 ... 250 W
Electronic transformers with LV-LED:	20 ... 50 W
Dimmable HV LED lamps:	typical 3 ... 50 W
Dimmable compact fluorescent lamps:	typical 3 ... 50 W
Ohmic-inductive:	20 ... 250 VA
Ohmic-capacitive:	20 ... 250 W
Capacitive-inductive:	not permitted

Connection:

single wire:	screw terminals
stranded without ferrule:	0.5 ... 4 mm ²
stranded with ferrule:	0.5 ... 4 mm ²
stranded with ferrule:	0.5 ... 2.5 mm ²

Mounting width:

72 mm (4 rail units)

Approvals:

VDE

Ref.-no.

LED universal dimming actuator, 2-gang

2 x 300 W, HV LED lamps typ. 2 x 3 ... 60 W

Rail mounting device, 4 rail units

ETS product family: Illumination • Product type: Dimmer

3902 REGHE**Intended use**

• Switching and dimming of incandescent lamps, HV halogen lamps, dimmable HV-LED lamps, dimmable compact fluorescent lamps, dimmable inductive transformers with LV halogen or LV LED lamps, dimmable electronic transformers with LV halogen or LV LED lamps • Mounting on DIN rail according to EN 60715 in distribution boxes

Product characteristics

• Automatic or manual selection of the dimming principle suitable for the load • Protected against no-load, short-circuit and overheating • Signal in the event of a short-circuit • Outputs can be operated manually • Feedback of the switching position and the dimming value • Parameterisable switch-on and dimming behaviour • Time functions: switch-on delay, switch-off delay, staircase lighting timer with run-on time • Light scene operation • Disabling of individual outputs manually or by bus • Status indicator of the outputs via LED • Operating hours counter • Mains failure longer than approx. 5 seconds leads to switch-off of the dimmer actuator. • Depending on the parameter setting, the connected load is calibrated after resumption of power supply.

Technical data

Rated voltage:	AC 110 ... 230 V ~, 50/60 Hz
Power loss:	max. 4 W
Stand-by power:	max. 0.8 W
Ambient temperature:	-5 ... +45 °C
Storage/transport temperature:	-25 ... +70 °C
Contact type:	ε, MOSFET

Lamp loads

Connected load, 230 V per output

Incandescent lamps:	20 ... 300 W
HV halogen lamps:	20 ... 300 W
Inductive transformers:	20 ... 300 VA
Inductive transformers with LV-LED:	20 ... 100 VA
Electronic transformers:	20 ... 300 W
Electronic transformers with LV-LED:	20 ... 100 W
Dimmable HV LED lamps:	typical 3 ... 60 W
Dimmable compact fluorescent lamps:	typical 3 ... 60 W
Ohmic-inductive:	20 ... 300 VA
Ohmic-capacitive:	20 ... 300 W
Capacitive-inductive:	not permitted

Connected load, 110 V per output

Incandescent lamps:	20 ... 150 W
HV halogen lamps:	20 ... 150 W
Inductive transformers:	20 ... 150 VA
Inductive transformers with LV-LED:	20 ... 50 VA
Electronic transformers:	20 ... 150 W
Electronic transformers with LV-LED:	20 ... 50 W
Dimmable HV LED lamps:	typical 3 ... 30 W
Dimmable compact fluorescent lamps:	typical 3 ... 30 W
Ohmic-inductive:	20 ... 150 VA
Ohmic-capacitive:	20 ... 150 W
Capacitive-inductive:	not permitted

Connection:

single wire:	0.5 ... 4 mm ²
stranded without ferrule:	0.5 ... 4 mm ²
stranded with ferrule:	0.5 ... 2.5 mm ²

Mounting width:

72 mm (4 rail units)

Approvals:

VDE

Ref.-no.

LED universal dimming actuator, 4-gang

4 x 250 W, HV LED lamps typ. 4 x 3 ... 50 W
1 x 950 W

Rail mounting device, 8 rail units

ETS product family: Illumination • Product type: Dimmer

3904 REGHE**Intended use**

• Switching and dimming of incandescent lamps, HV halogen lamps, dimmable HV-LED lamps, dimmable compact fluorescent lamps, dimmable inductive transformers with LV halogen or LV LED lamps, dimmable electronic transformers with LV halogen or LV LED lamps • Mounting on DIN rail according to EN 60715 in distribution boxes

Product characteristics

• Automatic or manual selection of the dimming principle suitable for the load • Protected against no-load, short-circuit and overheating • Signal in the event of a short-circuit • Outputs can be operated manually • Feedback of the switching position and the dimming value • Parameterisable switch-on and dimming behaviour • Time functions: switch-on delay, switch-off delay, staircase lighting timer with run-on time • Light scene operation • Disabling of individual outputs manually or by bus • Status indicator of the outputs via LED • Operating hours counter • Mains failure longer than approx. 5 seconds leads to switch-off of the dimmer actuator. • Depending on the parameter setting, the connected load is calibrated after resumption of power supply. • Increase in output power possible through parallel switching of multiple outputs (max. 950 W)

Technical data

Rated voltage:	AC 110 ... 230 V ~, 50/60 Hz
Power loss:	max. 8 W
Stand-by power:	max. 1.4 W
Ambient temperature:	-5 ... +45 °C
Storage/transport temperature:	-25 ... +70 °C
Contact type:	ε, MOSFET

Lamp loads

Connected load, 230 V per output

Incandescent lamps:	20 ... 250 W
HV halogen lamps:	20 ... 250 W
Inductive transformers:	20 ... 250 VA
Inductive transformers with LV-LED:	20 ... 100 VA
Electronic transformers:	20 ... 250 W
Electronic transformers with LV-LED:	20 ... 100 W
Dimmable HV LED lamps:	typical 3 ... 50 W
Dimmable compact fluorescent lamps:	typical 3 ... 50 W
Ohmic-inductive:	20 ... 250 VA
Ohmic-capacitive:	20 ... 250 W
Capacitive-inductive:	not permitted

Connected load, 110 V per output

Incandescent lamps:	20 ... 120 W
HV halogen lamps:	20 ... 120 W
Inductive transformers:	20 ... 120 VA
Inductive transformers with LV-LED:	20 ... 50 VA
Electronic transformers:	20 ... 120 W
Electronic transformers with LV-LED:	20 ... 50 W
Dimmable HV LED lamps:	typical 3 ... 24 W
Dimmable compact fluorescent lamps:	typical 3 ... 24 W
Ohmic-inductive:	20 ... 120 VA
Ohmic-capacitive:	20 ... 120 W
Capacitive-inductive:	not permitted

Connection:

single wire:	0.5 ... 4 mm ²
stranded without ferrule:	0.5 ... 4 mm ²
stranded with ferrule:	0.5 ... 2.5 mm ²

Mounting width:

144 mm (8 rail units)

Approvals:

VDE

Ref.-no.

LED dimming actuator 4-gang

Rail mounting device, 4 rail units

3904 REG LED**Intended use**

- LED dimmer for controlling LEDs and LED modules 12 – 24 V (pulse width-modulated PWM)
- Mounting on DIN rail according to EN 60715 in distribution boxes

Product characteristics

- 4 individually configurable LED dimming channels
- Maximum output current of 5 A per channel
- At 24 V DC up to 480 W LED output
- Possible channel combinations:
 - 4 x independent channels
 - 2 x Tunable White channels
 - 2 x independent channels, 1 x Tunable White channel
 - 1 x RGB channel, 1 x independent channel
 - 1 x RGBW channel
- Activation of the colour channels via "HSV" or "RGB"
- Integrated 230 V C-load relay to switch the LED power supply
- Integrated protection with on-site display against:
 - Overcurrent
 - Overvoltage
 - Overtemperature
 - Reverse polarity

Technical data

Rated voltage:	AC 230 V ~
Mains frequency:	50 Hz
Rated current:	16 A (C load)
Power loss:	max. 6 W
Connection:	screw terminals
single wire:	2.5 ... 4 mm ²
stranded without ferrule:	4 mm ²
stranded with ferrule:	2.5 mm ²
Rated voltage KNX:	DC 21 ... 32 V SELV
Current consumption KNX:	max. 18.9 mA
Connection, KNX:	terminal
LED	
Connection:	DC 12 ... 24 V SELV < 20 A from device acc. to EN 61347-2-13 for LED modules with constant output voltage
Current consumption:	20 mA
Outputs	
Number:	4
Max. current per output:	5 A
For LED modules with constant input voltage to EN 62031.	
LED modules with shared anode.	
PWM frequency:	488 / 600 Hz
Cable length:	depending on the cable resistance (voltage drop)
Connection:	screw terminals
single wire:	4 mm ²
stranded without ferrule:	4 mm ²
Mounting width:	72 mm (4 rail units)
Ambient temperature:	-5 ... +45 °C
Storage/transport temperature:	-25 ... +70 °C

Ref.-no.

LED dimming actuator 4-gang**3904 EB LED****Intended use**

- LED dimmer for controlling LEDs and LED modules 12 – 24 V (pulse width-modulated PWM)
- Mounting in false ceilings, surface mounting or in/ under furniture

Product characteristics

- 4 individually configurable LED dimming channels
- Maximum output current of 5 A per channel
- At 24 V DC up to 480 W LED output
- Possible channel combinations:
 - 4 x independent channels
 - 2 x Tunable White channels
 - 2 x independent channels, 1 x Tunable White channel
 - 1 x RGB channel, 1 x independent channel
 - 1 x RGBW channel
- Activation of the colour channels via "HSV" or "RGB"
- Integrated 230 V C-load relay to switch the LED power supply
- Integrated protection with on-site display against:
 - Overcurrent
 - Overvoltage
 - Overtemperature
 - Reverse polarity

Control unit 1 – 10 V, 4-gang

Rail mounting device, 4 rail units
 ETS product family: Illumination
 Product type: Dimmer

2194 REGHM**Intended use**

• Switching and brightness setting for lamps with operating devices with 1 – 10 V interface • Switching of electrical loads • Mounting on DIN rail according to EN 60715 in distribution boxes

Product characteristics

• Manual switching of the relays is independent of the bus • Switching of capacitive loads and the resulting high switch-on currents • Flexible assignment of control inputs to switching outputs, e.g. to control RGBW lamps • Operation of the switching outputs as a switching actuator • Connection of different phase conductors possible • No additional power supply necessary • Feedback of switching state and brightness value • Switch position display • Burn-in function for fluorescent lamps • Switch-on and dimming behaviour can be set • Time functions: switch-on delay, switch-off delay, staircase lighting timer with pre-warning function • Integration into light scenes • Operating hours counter

**Technical data**

Rated voltage KNX: DC 21 ... 32 V SELV
 Current consumption KNX: max. 6 mA
 Power loss: max. 4 W
 Ambient temperature: –5 ... +45 °C
 Storage/transport temperature: –25 ... +70 °C

Control outputs

Control voltage: 1 ... 10 V
 Control current per output: max. 100 mA
 Cable length: max. 500 m (0.5 mm²)

Switching outputs

Contact type: floating relay contacts (μ contact)
 Switching voltage AC: AC 250 / 400 V
 Switching current 230 V AC1: 16 A
 Switching current 230 V AC3: 10 A
 Switching current 400 V AC1: 10 A
 Switching current 400 V AC3: 6 A
 Fluorescent lamps: 16 AX
 Switching voltage DC: DC 12 ... 24 V
 Switching current DC: 16 A
 Min. switching current: 100 mA
 Switch-on current 150 μs: 600 A
 Switch-on current 600 μs: 300 A
 Ohmic load: 3680 W
 Capacitive load: 16 A / 200 μF

Lamp loads

Incandescent lamps:	3680 W	Compact fluorescent lamps	
HV halogen lamps:	3680 W	non-compensated:	3680 W
Inductive transformers		parallel compensated:	2500 W / 200 μF
with LV halogen lamps:	2000 VA	Mercury vapour lamps	
Electronic transformers		non-compensated:	3680 W
with LV halogen lamps:	2500 W	parallel compensated:	3680 W / 200 μF
Fluorescent lamps T5/T8			
non-compensated:	3680 W		
parallel compensated:	2500 W / 200 μF		
lead-lag circuit:	3680 W / 200 μF		
Connection, outputs:	screw terminals		
single wire:	0.5 ... 4 mm ²		
stranded without ferrule:	0.34 ... 4 mm ²		
stranded with ferrule:	0.14 ... 2.5 mm ²		
Mounting width:	72 mm (4 rail units)		

Ref.-no.

Fan coil actuator 2-gang

Rail mounting device, 4 rail units

with manual electronic operation and LED status indication

Only with the ETS 3.0d version or later versions the full functionality will be available.

ETS product family: Heating, A/C, Ventilation

Product type: Fan-coil

FCA 2 REGHE**Product characteristics**

- Connection of a fan coil unit with up to 6 fan stages or connection of fan coil units with up to 3 fan stages respectively
- Manual output control, provisional operation
- Control options for heating, cooling or combined heating/cooling operation
- 2-pipe or 4-pipe operation
- Individual or hierarchical switching of fan stages
- Feedback
- Output state indication
- Disabling function for each channel

Modes of operation

- Bus operation: operation via touch sensors or room controller
- Temporary manual control: manual operation locally with keypad, automatic return to bus operation
- Permanent manual control mode: only manual operation locally on device

Technical data

KNX supply:	DC 21 ... 32 V SELV
Power consumption KNX:	typical 150 mW
Rated voltage:	AC 230/240 V ~, 50/60 Hz
Power loss:	max. 3 W
Ambient temperature:	-5 ... +45 °C
Storing temperature:	-25 ... +70 °C
Connection, KNX:	bus connection block
Connection, mains and outputs:	screw terminals
single wire:	0.5 ... 4 mm ²
stranded without ferrule:	0.5 ... 4 mm ²
stranded with ferrule:	0.5 ... 2.5 mm ²
Switch type:	make contact
Contact type:	floating relay contacts (μ contact)
Switching voltage:	AC 230/240 V ~
Breaking capacity AC1:	10 A
Breaking capacity AC3:	10 A

Switching capacities per output

Ohmic load:	2300 W
Capacitive load:	10 A / max. 140 μF
Motors:	1380 VA
Lamp loads:	
Incandescent lamps:	2300 W
HV halogen lamps:	2300 W
Inductive transformers	
with LV halogen lamps:	1200 VA
Electronic transformers	
with LV halogen lamps:	1500 W
Fluorescent lamps:	
- non-compensated:	1000 W
- parallel compensated:	1160 W / 140 μF
- lead-lag circuit:	2300 W / 140 μF
Approvals:	VDE

Ref.-no.

Room actuator 110 – 230 V

Rail mounting device, 4 rail units
with manual electronic operation and LED status indication
Only with the ETS 3.0d version or later versions the full functionality will be available.
ETS product family: Output
Product type: Binary output

RA 23024 REGHE

**Intended use**

- Switching of electrical consumers AC 110 – 230 V with floating contacts
- Switching of electrically operated blinds, shutters, awnings and similar curtains
- Heating outputs: electronic outputs for switching electro-thermal valve drives

Product characteristics

- Manual output control, provisional operation
- Feedback in manual control mode and in bus operation
- Scene function
- Disabling of individual outputs by hand or via the bus

Switching function

- Make-contact and break-contact operation
- Logic operation and forcing function
- Feedback function
- Central switching function with group feedback
- Time functions: ON-delay, OFF-delay, staircase lighting timer with early-warning function

Technical data

KNX supply:	DC 21 ... 32 V SELV
Power consumption KNX:	max. 150 mW
Power supply mains:	AC 110 ... 230 V ~, 50/60 Hz
Power loss:	max. 6 W
Ambient temperature:	-5 ... +45 °C
Storing temperature:	-25 ... +70 °C
Mounting width:	72 mm (4 rail units)
Connection, KNX:	bus connection block
Connection, mains and outputs:	screw terminals
single wire:	0.5 ... 4 mm ²
stranded without ferrule:	0.5 ... 4 mm ²
stranded with ferrule:	0.5 ... 2.5 mm ²

Heating outputs

Number:	2
Contact type:	semiconductor, ϵ
Switching voltage:	AC 230/240 V ~
Switching current:	5 ... 50 mA
Switch-on current:	max. 1.5 A (2 s)
Number of drives per output:	max. 4
Approvals:	VDE

Blind/shutter function

- Suitable for AC motors 110 – 230 V
- Direct control of blind/shutter position
- Direct control of slat position
- Checkback of running state, blind/shutter position and slat position
- Forced-control position from primary control
- Safety function: 3 independent wind alarms, rain alarm, frost alarm
- Sun protection function

Control of valve drives 230 V

- Switching or PWM operation
- Control of valve drives with working characteristics "normally open" or "normally closed"
- Overload and short-circuit protection
- Emergency operation in the event of bus failure for summer and winter
- Protection against jamming valves
- Forced-control position

Relay outputs

Number:	4 (2 channels for operating blinds)
Contact type:	floating make contact (μ contact)
Switching voltage:	AC 230/240 V ~
Breaking capacity AC1:	16 A
Breaking capacity AC3:	6 A
Breaking capacity fluorescent lamps:	16 AX
Switching capacities per output	
Ohmic load:	3000 W
Capacitive load:	16 A / max. 140 μ F
Motors:	1380 VA
Lamp loads:	
Incandescent lamps:	3000 W
HV halogen lamps:	2500 W
Electronic transformers with LV halogen lamps:	1500 W
Inductive transformers with LV halogen lamps:	1200 VA

Heating actuator, 6-gang

Rail mounting device, 4 rail units

6 outputs "TRIAC"

with manual electronic operation and LED status indication

ETS product family: Heating, A/C, Ventilation

Product type: Valve

2336 REG HZ HE**Intended use**

- Switching of electrothermal actuators for heaters or cooling ceilings
- Installation in distribution boxes on DIN rail according to DIN EN 60715

Product characteristics

- Switching operation or PWM operation
- Actuators with characteristics opened or closed without power controllable
- Valve drives for 230 V or 24 V controllable
- Outputs can be operated manually, construction site mode
- Feedback in manual mode and in bus mode
- Disabling of individual outputs manually or by bus
- Overload-protected, short circuit-protected; error indication with LED
- Protection against jamming valves
- Forced position
- Various setpoints for forced position or emergency operation in case of bus failure for summer or winter
- Cyclical monitoring of the input signals can be parameterised
- Feedback via bus, e.g. in case of mains failure, overload or sensor failure

Technical data

Rated voltage:	AC 110 ... 230 V ~, 50/60 Hz
Stand-by power:	max. 0.4 W
Power loss:	max. 1 W
Rated voltage KNX:	DC 21 ... 32 V SELV
Power consumption KNX:	max. 250 mW
Ambient temperature:	-5 ... +45 °C
Storage/transport temperature:	-25 ... +70 °C
Heating outputs	
Contact type:	semiconductor (triac), ϵ
Switching voltage:	AC 24 / 230 V ~
Mains frequency:	50 / 60 Hz
Switching current:	5 ... 160 mA
Switch-on current:	max. 1.5 A (2 s)
Switch-off current:	max. 0.3 A (2 min)
Number of drives per output	
230 V drives:	max. 4
24 V drives:	max. 2
Mounting width:	72 mm (4 rail units)
Connection, outputs:	
single wire:	0.5 ... 4 mm ²
stranded without ferrule:	0.5 ... 4 mm ²
stranded with ferrule:	0.5 ... 2.5 mm ²

Analogue actuator, 4-gang

Rail mounting device, 4 rail units

ETS product family: Output

Product type: Analogue output 4-gang

2204.01 REGA**The analogue output needs 24 V AC for operation.****The necessary power can be supplied by the power supply unit ref.-no.: WSSV 10.**

- The analogue output converts measuring data received via KNX telegrams (DPT-ID 9.0xx and 5.010) into analogue output signals.
- The analogue output signals enable heating, ventilation and air conditioning units to adapt their output values to information received from the bus and thus to take part in control processes.
Voltage signals: 0 ... 1 V DC 0 ... 10 V DC
Current signals: 0 ... 20 mA DC 4 ... 20 mA DC
- The analogue output offers four analog outputs which can be software-parameterised for one of the ranges mentioned above. Outputs not used can be deactivated.
- The output variables can be force-controlled from a coordinating control system.
- With an analogue output extension module, the number of analog outputs can be increased from 4 to 8.
- In conjunction with the "dimming" function of a sensor, both, the analogue output and also the analogue output extension module can be used as an active control unit for dimming applications.

Remarks on the hardware:

- The GND terminals must not be connected to the corresponding terminals of another device.
- The outputs of the analogue output and of the analogue output extension module must not be connected to the 1 ... 10 V interface of electronic ballasts or electronic transformers.
- All connected components must ensure safe separation from other voltages

Technical data

Power supply

Supply voltage: AC 24 V ~ ± 10 %

Current consumption: max. 308 mA

Rated voltage KNX: DC 21 ... 32 V SELV

Power consumption KNX: typical 150 mW

Ambient temperature: -5 ... +45 °C

Storage/transport temperature: -25 ... +70 °C

Humidity

Ambient/storage/transport: max. 93 % r. h., no condensation

Mounting width: 72 mm (4 rail units)

Weight: approx. 180 g

Terminals

Outputs, power supply: screw terminals

single wire: 0.5 ... 4 mm²stranded without ferrule: 0.5 ... 4 mm²stranded with ferrule: 0.5 ... 2.5 mm²

KNX: bus connection block

Analogue outputs

Number: 4

Ranges: 0 ... 1 V, 0 ... 10 V, DC

0 ... 20 mA, 4 ... 20 mA, DC

Voltage signal load: ≥ 1 kW

Current signal load: ≤ 500 W

Power supply

Analogue actuator module: DC 24 V via system bus

max. 80 mA

Ref.-no.

Analogue actuator module, 4-gang

Rail mounting device, 4 rail units

2204.01 REGAM

Extension module for analogue actuator 4-gang ref.-no.: 2204.01 REGA

Function

- The analogue actuator module extends a KNX analogue actuator 4-gang by four additional sensor outputs.
 - The analogue output extension module offers four analogue outputs which can be software parameterised for one of the following ranges.
 - Outputs not used can be deactivated.
- Voltage signals: 0 ... 1 V DC 0 ... 10 V DC
Current signals: 0 ... 20 mA DC 4 ... 20 mA DC

Technical data

Power supply

Supply voltage:	AC 24 V ~ ± 10 %
Current consumption:	max. 120 mA
Current consumption at system	6 mA

connector:

Ambient temperature:	-5 ... +45 °C
Storage/transport temperature:	-25 ... +70 °C

Humidity

Ambient/storage/transport:	max. 93 % r. h., no condensation

Current signal load: ≤ 500 W

Multistation

KNX MULTISTATION

Compact device for the distribution

The KNX Multistation combines input and output channels in one compact device. Using logic functions, inter-device connections to the building control system are possible. Functions are combined in one unit that otherwise can only be provided using multiple individual devices – such as lighting, blind and temperature control.

This multitasking building automation device proves itself as a genuine problem solver: Due to its functional depth, the Multistation is ideally suited for quick and cost-efficient equipping, for example, offices, hotels or also hospitals. Only one device per room is needed; the configuration can optionally be made without ETS group addresses and then

easily duplicated for all other rooms. Without additional work. With only 4 TE, the Multistation only requires a little space in the switch cabinet and is thus also ideally suited for retrofitting. And due to the low requirement for power supplies, the costs are of course also lower than for the use of individual switching, dimming and blinds actuators.

Ref.-no.

Multi station

Rail mounting device, 4 rail units

23066 REGHE**Intended use**

- Switching of electrical loads with floating contacts
- Switching of electrically-driven blinds, shutters, awnings and similar hangings
- Switching of electrothermal drives
- Polling of conventional switching or push-button contacts, window contacts etc. in KNX systems, for reporting of states, meter levels, operation of loads, etc.
- Polling of external temperature sensors for heating control
- Logic functions to control building functions
- Mounting on DIN rail according to EN 60715 in distribution boxes

Product characteristics

- Actuator functions: switching, blinds, electrothermal drives
- Actuator function can be switched in pairs
- Integrated push-button interface with 6 inputs
- 2 integrated room temperature controllers
- 2 inputs for temperature sensors (ref.-no. FF 7.8)
- Outputs can be operated manually, construction site mode
- Feedback in manual mode and in bus mode
- Scene function
- Disabling of individual outputs manually or by bus

Switching function

- Max. 6 switching outputs
- Operation as NO or NC contacts
- Logic operation and forcing function
- Feedback function
- Central switching function with collective feedback
- Time functions: switch-on delay, switch-off delay, staircase lighting timer with pre-warning function

Blinds function

- Max. 3 blinds outputs
- Suitable for 230 V AC motors
- Blind/shutter position directly controllable
- Slat position directly controllable
- Feedback of movement status, blind/shutter position and slat position
- Forced position through higher-level controller
- Safety function: 3 independent wind alarms, rain alarm, frost alarm
- Sun protection function

Function of valve drives

- Max. 2 outputs for electrothermal drives
- Switching operation or PWM operation
- Actuators with characteristics opened or closed without power controllable
- Emergency operation in case of bus voltage failure for summer and winter
- Protection against jamming valves
- Forced position
- Cyclical monitoring of the input signals can be parameterised

Heating controller

- 2 internal controllers to control two independent rooms
- Control for heating or cooling, optionally with additional level
- On-off, PWM or PI control
- Predefined heating types (hot water heating, fan coil unit ...) or individual parameters possible

Inputs

- 6 inputs for push-buttons
- Input functions: switching, dimming, blinds control, light scene extension unit, brightness or temperature value transmitter
- 2 inputs for external temperature sensors

Logic functions

- Up to 10 logic operations with up to 8 inputs each, e.g. for AND, OR and XOR operations
- Conversion of data point types, e.g. from 1-bit to 8-bit
- Comparative operations, e.g. <, >, ≤, ≥
- Arithmetic functions, e.g. +, -, *, :

Flush mounting actuators

Small and compact: These features distinguish the KNX flush mounting actuators. Thanks to the flush mounting or installation in trunking etc., they are extremely space-saving with extensive functional depth. They all have multiple, integrated binary inputs.

The Room Climate Interface offers one blind/shutter output, one heating output and three binary inputs. On the one hand, the binary inputs of the flush mounting actuators can be used for „local operation“. On the other hand, they are used as extension inputs for the connection of floating contacts e.g. window contacts, whereby the respective range of functions can be expanded at low cost.

Ref.-no.

Flush-mounted switch actuator, 1-gang with satellite input

1 make contact, 2 binary inputs

ETS product family: Output

Product type: Binary output

2131.16 UP

Intended use

- Switching of electrical loads for AC 230 V mains voltage
- Installation in appliance box to DIN 49073
- Connection with enclosed terminals

Product characteristics

- Two binary inputs for potential-free contacts, usable as extension inputs for local operation
- Operation as NO or NC contacts
- Feedback function
- An additional function: logical, forced-position or time function
- Time functions: switch-on delay, switch-off delay, staircase lighting timer
- Supply via bus, no additional power supply necessary

Technical data

Output

Number:	1
Switch type:	floating make contact (μ contact)
Max. switching voltage:	AC 230 V ~
Max. switching current:	16 A at 230 V AC
Switching capacity

Ref.-no.

Flush-mounted room climate interface with satellite input

3 binary inputs

1 blinds output, 1 output "TRIAC" (heating)

2531 UP

Intended use

- Switching of electrically-driven blinds, awnings and similar blinds for AC 230 V mains voltage
- Switching of electrothermal actuators
- Installation in appliance box to DIN 49073
- Connection with enclosed terminals

Product characteristics

- Control of Venetian blinds, awnings and similar blinds
- Control of electrothermal actuators
- Three binary inputs for potential-free contacts, usable as extension inputs for local operation
- Supply via bus, no additional power supply necessary

Blinds function

- Blind position directly controllable
- Slat position directly controllable
- Feedback of movement status, blind position and slat position
- Forced position through higher-level controller
- Safety function: 3 independent wind alarms, rain alarm, frost alarm
- Sun protection function

Function of valve drives

- Switching operation or PWM operation
- Valve drives with characteristics opened or closed without power
- Overload-protected, short circuit-protected
- Protection against jamming valves
- Forced position
- Cyclical monitoring of the input signals configurable

PWM operation: electrothermal actuators only have the positions Open and Closed. In PWM operation, switch-on and switch-off during the drive's cycle time achieves an almost constant behaviour.

**Flush-mounted dimming actuator, 1-gang, 50 – 210 W/VA
with satellite input**

2 binary inputs

ETS product family: Illumination

Product type: Dimmer

3210 UP**Intended use**

- Switching and dimming of incandescent lamps, 230 V halogen lamps and LV halogen lamps with inductive transformers or Tronic transformers
- Installation in appliance box to DIN 49073

Product characteristics

- Automatic selection of the dimming principle suitable for the load
- Protected against no-load, short-circuit and overheating
- Feedback of the switching position and the dimming value
- Parameterisable switch-on and dimming behaviour
- Timed dimmer: switch-on delay, switch-off delay, staircase lighting timer
- Light scene operation
- Two binary inputs for potential-free contacts, usable as extension inputs for local operation
- Supply via bus, no additional power supply necessary
- Mains failure longer than approx. 0.7 seconds leads to switch-off of the dimmer actuator

Technical data

Output:	1 Power MOS-FET
Dimming method:	trailing edge or leading edge phase control
Terminals	
Output cable:	L = black, dimming output = brown, 0.75 mm ² length approx. 20 cm
Bus and control cable:	KNX + red KNX – black binary input 1 green GND white binary input 2 yellow GND brown length approx. 33 cm, extendible to 5 m max.
Satellite input:	depending on parameterization either as extension inputs for push-button local control of the actuator or as independent binary inputs acting on the bus
Dimensions:	Ø 63 mm, height 25 mm

**Valve drive (motor-operated)
with controller**

electromechanical servo drive
ETS product family: Heating, A/C, Ventilation
Product type: Valve

2177 SV R**Intended use**

- Motor-operated valve drive for heating or cooling valves
- To be screwed on valve head

Product characteristics

- Integrated temperature sensor
- Room temperature control
- Mechanical indication of valve lift
- Automatic detection of valve lift
- One input, can be used as binary input or for an external temperature sensor (ref.-no.: FF 7.8)
- Use in heating circles possible
- Integrated bus coupling unit
- Valve protection function

Technical data

Rated voltage KNX:	DC 21 ... 32 V SELV
Current consumption KNX:	max. 20 mA
Protection class:	III
Valve connection:	M 30 x 1.5
Valve lift:	1.0 ... 4.2 mm
Actuating power:	80 ... 120 N
Dimensions (L x W x H):	76 x 47 x 85 mm
Connection cable	
Cable type:	J-YY 1 x 2 x 0.6 mm
Cable length:	1 m
Total length per line:	max. 30 m
Number of drives per line:	max. 30
Connection cable, binary input/external sensor	
Cable length:	max. 10 m
single wire:	0.08 ... 1.5 mm ²
stranded without ferrule:	0.08 mm ² ... 1.0 mm ²
stranded with ferrule:	0.14 mm ² ... 0.5 mm ²
Protection level:	IP 40
Ambient temperature:	0 ... +50 °C
Storage/transport temperature:	-20 ... +70 °C
Relative humidity:	5 ... 95 % (no condensation)

Ref.-no.

Condensation sensor**BTS 01****Intended use**

- Detection of water condensation on coolant lines in residential or functional buildings
- Connection to KNX push-button interfaces or similar binary inputs
- Fitting on the coolant line

Technical data

Rated voltage:	DC 3.3 ... 5 V SELV
Current consumption:	typical 0.5 mA
Short-circuit current:	max. 100 mA
Protection class:	III
Ambient temperature:	0 ... +50 °C
Length of connected cable:	2 m
Protection level:	IP 67

Leakage sensor**LES 01****Intended use**

- Detection of water penetration and leaks
- Connection to KNX push-button interfaces or similar binary inputs
- Fitting to the surface to be monitored

Application examples

- Below or next to the bathtub or shower
- Under the kitchen unit
- Below or behind washing machines
- In boiler rooms
- In supply shafts with water pipes
- In cellar rooms with a risk of backflow
- Below or behind aquariums
- In the heating manifold of floor heating systems

Technical data

Rated voltage:	DC 3.3 ... 5 V SELV
Current consumption:	typical 0.5 mA
Short-circuit current:	max. 100 mA
Protection class:	III
Ambient temperature:	0 ... +50 °C
Length of connected cable:	2 m
Protection level:	IP 67

Ref.-no.

Binary input, 6-gang

Rail mounting device, 2 rail units

6 inputs AC/DC 10 ... 230 V ~

(different L conductors possible, e.g.: E1-3 = L1 and E4-E6 = L2)

with status indicator

ETS product family: Input

Product type: Binary input

2116 REG**Intended use**

- Polling of conventional switching or push-button contacts, window contacts etc. in KNX systems, for reporting of states, operation of loads, etc.
- Mounting on DIN rail according to EN 60715 in distribution boxes

Product characteristics

- Status LED for each input
- Evaluation of voltage levels and changes at the input
- Transmitting of input status to the bus
- Transmitting behaviour adjustable
- Functions: switching, dimming, blinds up/down, brightness values, temperatures, calling up and saving light scenes, etc.
- Impuls and switch counter function
- Inputs can be blocked separately
- Connection of external AC or DC voltages

Technical data

Rated voltage KNX:	DC 21 ... 32 V SELV
Current consumption KNX:	max. 7.5 mA
Connection, KNX:	terminal
Ambient temperature:	-5 ... +45 °C
Storage/transport temperature:	-25 ... +75 °C
Relative humidity:	max. 93 % r. h., no condensation
Inputs	
Rated voltage:	AC/DC 10 ... 230 V
Signal level "0" signal:	AC/DC 0 ... 2 V
Signal level "1" signal:	AC/DC 7 ... 265 V
Input current at rated voltage:	approx. 0.7 mA
Rated frequency AC signal:	30 ... 60 Hz
Signal duration pulse counter:	min. 100 ms
Cable length:	max. 100 m
Number of contacts per input	
Make contacts:	max. 50
Break contacts:	max. 50
Mounting width:	36 mm (2 rail units)
Power loss:	max. 1 W
Connection:	screw terminals
single wire:	0.5 ... 4 mm ²
stranded without ferrule:	0.5 ... 4 mm ²
stranded with ferrule:	0.5 ... 2.5 mm ²

Ref.-no.

Binary input, 8-gang

Rail mounting device, 4 rail units

8 inputs 12 ... 48 V AC/DC

Auxiliary voltage output DC 24 V (SELV) for polling potential-free contacts with status indicator

ETS product family: Input

Product type: Binary input

2128 REG**Product characteristics**

- Status LED for each input
- Detection of voltage levels and changes on the input
- Transmitting the input state to the bus
- Transmission behaviour freely settable
- Functions: switching, dimming, blinds up/down, brightness values, temperatures, calling up and saving scenes
- Inputs can be disabled separately
- External AC and DC voltages can be connected
- Auxiliary voltage output for polling potential-free contacts
- No separate power supply required
- Separate reference potentials for inputs
- Pulse counter (firmware version V02 or higher), also suitable for S0 pulses

Technical data

Rated voltage KNX:	DC 21 ... 32 V SELV
Power consumption KNX:	max. 350 mW
Stand-by:	max. 200 mW
Connection, KNX:	terminal
Ambient temperature:	-5 ... +45 °C
Storage/transport temperature:	-25 ... +70 °C
Inputs	
Rated voltage:	AC/DC 12 ... 48 V
Signal level "0" signal:	AC/DC -48 ... +2 V
Signal level "1" signal:	AC/DC 8 ... 48 V
Input current at rated voltage:	2 mA
Signal duration:	min. 30 ms
Rated frequency AC signal:	30 ... 60 Hz
Number of contacts per input	
Make contacts:	unlimited
Break contacts:	max. 20
Output voltage:	DC 24 V SELV
Mounting width:	72 mm (4 rail units)
Stand-by power:	max. 200 mW
Power loss:	max. 1 W
Connection:	screw terminals
single wire:	0.2 ... 4 mm ²
stranded without ferrule:	0.34 ... 4 mm ²
stranded with ferrule:	0.14 ... 2.5 mm ²
Cable length:	max. 100 m

Ref.-no.

Push-button interface, 2-gang

ETS product family: Input

Product type: Binary input

2076-2 T

- Can be used as binary input
- Can be used as switching output, e.g. for LEDs, max. 0.8 mA

Technical data

Inputs

Number:	2
Signal voltage:	5 V
Signal current:	> 1 mA
Connection:	branching terminal, 5 pins
Length of input cable:	25 cm prefabricated, extendable to 5 m max

Outputs

Output voltage:	5 V with outputs open circuit (ballast resistor 3.9 k Ω)
Output current:	2 mA for red low-current LED (at approx. 1.4 V)
Dimensions (W x H x D):	28 x 43 x 16 mm

Ref.-no.

Push-button interface, 4-gang

ETS product family: Input

Product type: Binary input

2076-4 T

- Can be used as binary input
- Can be used as switching output, e.g. for LEDs, max. 0.8 mA

Technical data

Inputs

Number:	4
Signal voltage:	5 V
Signal current:	> 1 mA
Connection:	branching terminal, 5 pins
Length of input cable:	25 cm prefabricated, extendable to 5 m max

Outputs

Output voltage:	5 V with outputs open circuit (ballast resistor 3.9 k Ω)
Output current:	2 mA for red low-current LED (at approx. 1.4 V)
Dimensions (W x H x D):	28 x 43 x 16 mm

Energy sensor

KNX ENERGY SENSOR

Measurement and monitoring of energy consumption

The KNX energy sensor can also be retrofitted into already existing KNX systems and has three channels for connecting consumers. For each channel, the voltage, current, effective power and reactive power can be measured: these data are then sent cyclically to the KNX bus for evaluation and visualisation and when any changes occur.

The energy sensor has been expanded with the „converter measurement“ function using optimised software. As well as the three electrical circuits up to 16 Amp to date, it can now also measure the complete building consumption or commercial consumers up to 75 amperes using converters. The sensor records both consumption and supply.

Visualisation of the received data and energy monitoring is performed on the JUNG KNX smart displays or smart devices. Here the values can be stored over months and years and portrayed with clear graphics and statistics. This enables users to identify any possible savings potentials at a glance and to optimise their deployment of energy accordingly.

Ref.-no.

Energy detector, 3-gang, for rail mounting

Rail mounting device, 4 rail units

ETS product family: Physical sensors

Product type: Energy detector

2103 REG ES**Product characteristics**

The energy detector has three channels for connecting loads to up to three separate phases with a common neutral conductor. Each channel can measure:

- Voltage (eff.)
- Current (eff.)
- Active power
- Reactive power

Additionally, the active power and reactive power of all channels will be summed up and displayed as three-phase power values along with the mains frequency.

According to the parameterisation the measured values will be transmitted on the KNX bus, either cyclically and / or when the value changes. An additional telegram will be transmitted if certain values exceed or fall below a specified limit.

The following meters exist for each channel and for the three-phase values:

- 1 x energy meter total
- 1 x energy meter ¼ h value
- 3 x energy meter n
- 3 x energy intermediate meter n

New in version 01:

- Direct measurement (without transformer)
- Transformer measurement (with external 75 A transformer, ratio 75:5, e.g. Phoenix Contact order key 2277611)

Connection, KNX:	terminal

Multiroom amplifier

Central unit for audio distribution: The KNX Multiroom amplifier in its 19" rack housing routes the stereo sound from four sources to up to eight stereo loudspeaker outputs.

Sixteen radio stations can be selected using the integrated web radio. The MP3 player plays music data from the SD card that can be inserted into the integrated SD card reader. New music data can be transferred via FTP to the card at any time. Low-frequency (cinch) inputs for possible playback devices such as Hi-Fi system, DVD player and computer, etc. are available for the connection of other sources. Practical: Only the loudspeaker wiring is required in an existing KNX system.

EASY OPERATION USING KNX SENSORS

SYSTEM DESIGN

The multiroom amplifier including web radio and MP3 player is operated via the KNX system, together with room functions such as lighting and temperature. The volume is controlled using a rotary sensor; the source selection is made using push-button sensor. through the OLED graphic display of the connected room controller, the title, artist

and album or radio station are displayed on a scrolling text. The multiroom control can also be optionally performed using a web interface. As well as title selection and volume control etc., the desired zone can also be selected using this. Displaying the cover artwork of the selected album is an additional feature.

KNX ROOM CONTROLLER OLED

KNX Sonos Gateway

KNX SONOS GATEWAY

Integrating the Sonos sound system in KNX

This gateway connects the intelligent KNX technology to the Sonos multiroom sound. Using various controls or smart devices, up to 30 Sonos devices can be controlled – together with room functions such as lighting, shading and temperature. The operation of the rooms is then optionally performed individually or in parallel using the party mode.

Volume control, title selection, start/stop etc.: Intuitively controlled using KNX sensors or smart phone / tablet in connection with Smart Visu Server. Title, interpret and album are also shown on the displays of room controllers or smart devices. For even greater music enjoyment, playing back music on a micro SD card is also possible in the KNX Sonos Gateway (not included in the scope of delivery).

Ref.-no.

Sonos gateway

Rail mounting device, 2 rail units

ETS product family: Multimedia

Product type: Multiroom

MR-SONOS-REG**Intended use**

- Controlling of Sonos audio devices via KNX
- Mounting on DIN rail according to EN 60715 in distribution boxes

Product characteristics

- Control of up to 30 Sonos devices via KNX devices, independent of the Sonos App
- Dynamic group creation of up to five zones with one master and five slave devices each via KNX objects
- Party mode: same music for all rooms
- Volume control for master, slaves and the whole group
- Control of play lists
- Playing music from microSD card (not included) in the Sonos gateway
- Title, artist and album on KNX text objects
- Integrated data network switch with two RJ45 terminals
- Requires ETS version 4.2 or 5.0.2 or higher

Technical data

External supply

Rated voltage: DC 24 ... 30 V \pm 10 %

Connection: connecting terminal yellow/white

Power consumption: typical 2 W (at DC 24 V, two Ethernet cables connected)

IP communication: Ethernet 10/100 BaseT (10/100 Mbit/s)

IP connection: 2 x RJ45

Protocols: ARP, ICMP, IGMP, UDP/IP, DHCP, AutoIP,
KNXnet/IP (Core, Device Management)

Memory card: max. 32 GB microSDHC

Ambient temperature: 0 ... +45 °C

Storage/transport temperature: -25 ... +70 °C

Mounting width: 36 mm (2 rail units)

Rated voltage KNX: DC 21 ... 32 V SELV

Connection, KNX: bus connection block (red/black)

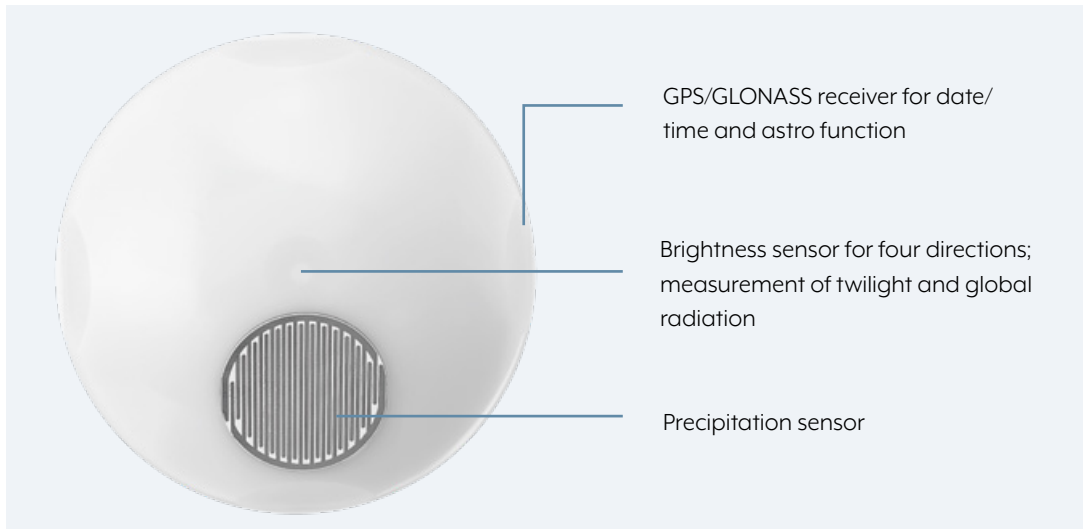

Universal weather station

KNX UNIVERSAL WEATHER STATION
Compact design, precise measurement

All important sensors for recording and evaluation of meteorological data combined in compact design: the JUNG KNX weather station for weather-dependent automatic shading control for façade protection.

Wind speed, wind direction, brightness in four directions, twilight, global radiation, precipitation, relative air humidity and air pressure are measured using the integrated sensors. The calculation of further data such as absolute humidity and perceived temperature is also carried out. Operating interdependently with each other, values are also determined in terms of the mugginess curve and comfort characteristic that can then be used to optimise the ventilation control.

These features are enhanced with a GPS/GLONASS receiver for the date and time and an astro function for determining the position of the sun. This makes it no-longer necessary to set the time manually. The installation of the weather station is carried out with its own fastening arm on the installation mast. This ensures the best capture and measurement of the weather data. The weather station can also be mounted onto the façade by means of the fastening arm.

Ref.-no.

KNX universal weather station

compact housing
including fastening arm
ETS product family: Input
Product type: Analogue input 4-gang

2225 WS U**Intended use**

- Measurement and evaluation of weather data: wind speed, wind direction, precipitation, brightness, global radiation, twilight, temperature, relative air humidity and air pressure
- Installation on the outside of buildings, preferable in the roof and facade area
- Operation with additional power supply (ref.-no.: WSSV 10)

Product characteristics

- Integrated GPS/GLONASS receiver for automated positioning
- Calculation of additional weather data: absolute air humidity, chill temperature, comfort
- Function for shading control
- Integrated KNX bus coupling unit
- Measuring and limit value monitoring
- Software logic modules for linking events
- Integrated heating

**The weather station needs an operating voltage supply of 24 V AC,
for example power supply module ref.-no. WSSV 10.**

KNX weather station "home"**2224 WH**

The KNX weather station detects the meteorological data "Wind speed", "Precipitation", "Twilight", "Temperature" and the brightness in three directions. Its main area of application is the automatic, weather-dependent control of shading. It is specially designed for use in homes. To increase functional reliability, the weather station monitors itself in some important functions, and reports any corresponding errors to the bus automatically via indicator objects. It is intended for outdoor installation on a mast or on a wall. The bus coupling to the KNX/EIB is integrated (monoblock). Evaluation of the data themselves, in particular the limiting value processing, is performed already in the weather station. A built-in heater protects against degradation of function from frost and moisture condensation down to $-20\text{ }^{\circ}\text{C}$. The heating system further ensures that the sensor surface of the precipitation sensor will dry off quickly after rain, and also melts snow and ice. Power is supplied to the unit via the bus, except for the heating system and the power supply for the precipitation sensor. The weather station requires an external 24 V AC/DC power supply for the heating system, without which precipitation detection is not possible. Logic gates are available for cascading a number of weather stations and for linking the limiting values and the monitoring functions. Blocking elements make it possible to block individual functions at the installation location.

Intended use

- Measurement and evaluation of weather data: wind speed, precipitation, twilight, temperature and brightness
- Vertical mounting on the outside of buildings, preferably on roofs and at façades

Product characteristics

- Integrated KNX bus coupler
- Compact housing
- Low-maintenance device
- Measured-value acquisition and limit value monitoring

The power supply ref.-no.: WSSV 10 is necessary for precipitation detection.

Output current: max. 1 A

Output voltage: AC 24 V ~

Storage/transport temperature: -25 ... +70 °C

Ambient temperature: -5 ... +40 °C

Relative humidity: max. 93 % r. h., no condensation

Mounting width: 72 mm (4 rail units)

Connection: screw terminals

single wire: 0.5 ... 4 mm²

stranded with ferrule: 0.14 ... 2.5 mm²

stranded without ferrule: 0.34 ... 4 mm²

Ref.-no.

Wind sensor**WS 10 W****Intended use**

- Sensor for measuring weather data
- Sensor signals are evaluated via additional electronics, e.g. analogue input (ref.-no. 2214 REG A)
- Detection of the horizontal wind speed
- Vertical installation in outdoor areas, e.g. on walls of buildings, using the supplied mounting bracket

Product characteristics

- Measurement of the rotational speed of the anemometer
- Output with analogue output signal 0 ... 10 V
- Maintenance-free
- Operation without additional power supply possible
- To avoid dew and condensation, use a separate power supply (ref.-no. WSSV 10) for heating

Technical data

Power supply

Rated voltage:	DC 18 ... 32 V SELV
Current consumption:	6 ... 12 mA

Heating

Rated voltage:	AC/DC 24 V
Switch-on current:	max. 1 A

Ambient temperature: -25 ... +60 °C

Protection class: III

Protection level: IP 65 (in position for use)

Output signal

Measuring range:	0.9 ... 40 m/s
Strain:	max. 60 m/s (for short periods)
Output voltage:	DC 0 ... 10 V
Load:	min. 1.5 kΩ

Cable type: LiYY 6 x 0.25 mm²

Cable length: approx. 3 m

can be extended up to: max. 100 m

Dimensions (Ø x H): 134 x 160 mm

Ref.-no.

Rain sensor**WS 10 R****Intended use**

- Sensor for measuring weather data
- Sensor signals are evaluated via additional electronics, e.g. analogue input (ref.-no. 2214 REG A)
- Detection of precipitation
- Installation in outdoor areas, e.g. on walls of buildings, using the supplied 110° mounting bracket

Product characteristics

- Measurement of the electrical conductivity on the sensor surface
- Output by means of analogue output signal: 0 = dry, 10 V = rain
- Heating of the sensor surface with separate 24 V AC/DC power supply, ref.-no.: WSSV 10

Technical data

Power supply

Rated voltage:	DC 15 ... 30 V
Current consumption:	approx. 10 mA

Heating

Rated voltage:	AC/DC 24 V
Power consumption:	max. 4.5 W

Ambient temperature: -30 ... +70 °C

Protection class: III

Protection level: IP 65

Output signal

Output voltage: DC 0 / 10 V

Load: min. 1 kΩ

Reaction time: max. 4 min

Cable type: LiYY 5 x 0.25 mm²

Cable length: approx. 3 m

can be extended up to: max. 100 m

Dimensions (Ø x H): 58 x 83 x 17 mm

	Ref.-no.
Brightness sensor Rated voltage 24 V DC range 0 ... 60 000 lux, linear 58 x 35 x 64 mm	WS 10 H

Dawn sensor Rated voltage 24 V DC range 0 ... 255 lux, linear 58 x 35 x 64 mm	WS 10 D
---	----------------

Temperature sensor Rated voltage 24 V DC range -30 °C ... +70 °C, linear 58 x 35 x 64 mm	WS 10 T
--	----------------

The brightness sensor is used for the measuring and evaluation of the brightness.

The dawn sensor is used for the measuring and evaluation of the brightness (dawn/dusk).

The temperature sensor is used for the measuring and evaluation of the temperature.

The value measured by the sensor is transmitted to an analogue output signal of 0 ... 10 V by the electronics.

Connections:

Plastic housing with PG7 thread + screw and pressure / moisture compensation (recommended cable 3 x 0.25 mm²)

+UB: operating voltage 24 V DC

GND: corresponding ground

OUT: output 0 ... 10 V

Technical data

Supply voltage:	24 V DC (15 ... 30 V DC)
Connection:	screw terminals
Terminals for:	2.5 mm ²
Connecting cable:	through screwed conduit entry PG 7
Recommended cable:	3 x 0,25 mm ²
Cable length:	max. 100 m
Output:	0 ... 10 V DC (into a load of at least 1 kΩ, short-circuit protected)
Ambient temperature:	-30 ... +70 °C
Protection level:	IP 65
Mounting position:	optional

Signalling System

The KNX signalling system uses a well thought out design for optimal functionality. The core is the central centre where the display is controlled and all processes are regulated.

KNX SMART PANEL 5.1

THE SYSTEM ALSO CONSISTS OF THE FOLLOWING MODULES AND FUNCTIONS:

Alert

Various devices for the loud and silent alarms.

Certainty

There is a locking unit for use on the entrance door.

Activation

Activation is done using a key switch.

Detectors

Sensors, contacts and movement detectors perform the monitoring tasks in rooms, on windows and doors.

ALARM SIGNALLING

Outdoor / indoor siren

**Smart Panel
with integrated BCU
aspect ratio 4:3**

for installation in walls, touch screen
fanless, without rotating parts

SP 5.1 KNX

Intended use

- Operation and visualisation of system statuses and information on building automation
- Flush-mounted fitting indoors

Integrated signalling system

A signalling system offers a safety-oriented system for the observation of windows and doors. The signalling system can display the status of window contacts, motion detectors or glass break sensors and monitors changes in the statuses of these detectors. The detectors integrated in the signalling system can be combined into up to two security areas (internal/external). Arming these areas allows monitoring of the secured area for break-ins when people are present or absent. In addition, sections of the area can be monitored for sabotage. If there is a break-in alarm, visual and acoustic alarms (flash light, siren) can be activated via KNX components (e.g. switching actuators).

Max. 40 detectors (KNX)

Two security areas

Product characteristics

- Illuminated graphic colour screen TFT, 640 x 480 pixels, 262 000 colours
- Touchscreen
- KNX Interface
- Interfaces – accessible from front: 1 x USB 2.0
- Interfaces – accessible from behind: Ethernet
- Graphical user interface for visualisation and operation of KNX devices
- Predefined graphical user interface
- Free graphical user interface
- KNX special functions, e.g. scenes, forced position, timer, presence simulation
- Fast access to pages and functions
- Remote access (remote function)
- Acoustic signal encoder, configurable
- Combination of predefined and free graphical user interface
- Master pages: max. 10
- Free pages: max. 50
- Elements: max. 400
- Copy & Paste functions
- 50 rooms
- 10 function units
- 240 functions, e.g.:
 - Scene recalls: max. 40
 - Signalling system: max. 40 detectors (internal and external skin together)
 - Datalogger: max. 20 datalogger channels
 - Logic gates: max. 80 gates with up to 8 inputs and one output each
 - Timers: max. 40
 - Limiting value modules: max. 40
 - Demultiplexer "1 to 2" and "1 to 4": max. of 7 each
 - Timer: max. 64 switching channels with a total of 128 switching times
 - Scenes: max. of 24 scenes, max. of 32 scene functions
 - Presence simulation: max. 8 simulations, max. 32 functions (15 functions per simulation)
 - Fault messages: max. 50
 - Event e-mails: max. 50
 - Video messages: max. 8
 - System time: max. 40

Locking unit**DAS 4370**

The motorized locking unit serves for the mechanical door lock.

It prevents an unintended entering of armed security areas.

Can be cascaded for several doors.

Features:

- Robust housing of plastics and stainless steel
- Electrical and mechanical emergency operation
- Low noise
- Low stand-by current
- Integrated magnetic contact
- Acknowledge of the bolt position
- To be controlled with static or dynamic signals
- Simple adaption to the door frame

One magnet and two counterparts are included in the delivery. To be integrated into the signalling system of the Smart Panels by the KNX system via switching actuators (inputs and emergency opening) or via binary inputs / push-button interfaces (evaluation of the locking unit outputs and the integrated magnetic contacts) respectively.

Supply voltage 12 V DC, separate power supply

Movement detector

PIR detection

DAS 4210

Detected area: 90° (volumetric), 34 double zones in 3 levels, maximum detected area approx. 15 x 15 m

The detector is a compact passive infra-red movement detector with micro processor. It is designed to be highly reliable and versatile. The detector has a memory which can be called by a signal at the control input. If the alarm system is active, a movement detection will trigger a relay and activate the memory logic.

The test LED is automatically disabled in the active state – there is no optical indication.

If the alarm system is deactivated (no signal at set input) a stored alarm will be indicated by a permanently lit LED. The stored alarm will automatically be deleted when the alarm system is activated again.

Since the control signal for the set input may vary, depending on the central unit, the polarity of the signal can be changed at the PIR detector.

The pyroelectric element of the PIR detector is separately encased to prevent insects or atmospheric turbulence to trigger false alarms.

The detector can be mounted at a wall or in a room corner.

To be integrated into the signalling system of the Smart Panels by the KNX system via binary inputs / push-button interfaces (evaluation of movement or sabotage).

Supply voltage 12 V DC, separate power supply

<p>A sealed tubular glass envelope protects the magnet contact (reed contact) against dust and water. The reed contact is actuated by means of a permanent magnet. For installation in steel profiles (magnetic material) only block reed contacts can be used. Included in delivery: 2 surface-mounted housings, 2 caps, 3 spacers 2 mm 1 spacer 6 mm To be integrated into the signalling system of the Smart Panels by the KNX system via binary inputs / push-button interfaces.</p>		

Signal panel

KNX SIGNAL PANEL

Surface mounting variant with robust plastic enclosure

The KNX signal panel is ideal for use in supermarkets, shops and offices. There are 24 capacitive sensor buttons on its high quality glass front that are used to control the lighting, blinds and scene functions for the entire premises. 24 coloured RGB LEDs and individual labelling strips make labelling simple and clear.

Ref.-no.

Signal panel

ETS product family: Display

Product type: Signal panel

glass green

MBT 2424

glass white

MBT 2424 WW

glass black

MBT 2424 SW

The glass panel with aluminium housing is equipped with 24 capacitive sensor buttons and 24 status LEDs. The panel enables the control of switching, dimming and push-button functions as well as light scene and value transmitter functions. The LEDs can be separately parameterised to be illuminated in green, red or blue to signalise different situations of the KNX installation. Single sensor buttons, full columns or the entire panel can be blocked with blocking functions. Acoustic signals when pushing the sensor buttons can be parameterised. The surface can be labelled with exchangeable labelling foils, which can be labelled with the JUNG label tool.

The MBT 2424 will be installed into a 2-gang wall box or a surface-mounted housing.

Programming takes place via ETS.

A drilling template and a bit for assembling will be delivered with the device.

Product characteristics

- Switching, dimming, push-button and blinds control, value transmitter and light scenes
- High quality glass surface with 24 sensor buttons
- Operation via touching the sensor buttons
- Labelling with exchangeable labelling foil
- Status feedback with 24 LEDs; the colours red, green and blue can be configured
- Acoustical feedback for touching sensor
- Fault message on dismantling
- Logic and time functions
- Integrated BCU
- Supply via separate power supply (ref.-no. NT 2405 VDC) or the auxiliary voltage output of the KNX power supply

Smart Panel

KNX SMART PANEL 5.1

Operating comfort on 14.5 cm screen diagonal: Thanks to integrated control software, the functions are displayed and controlled using the colour TFT touchscreen with the KNX Smart Panel 5.1.

JUNG GRAPHICAL USER INTERFACE

Visualisation and operation are performed using the uniform JUNG user interface that allows logical and intuitive operation of the various functions. This is generated quickly using the Smart Panel Designer.

FREELY CONFIGURABLE USER INTERFACE

As an alternative or additionally, a freely configurable user interface can be created. This enables the realisation of an individual display for the user.

Additional security is provided by the integrated signalling system in the Smart Panel for up to 40 detectors for interior and exterior perimeter protection. Additional functions are the 64-channel week timer with random and astro functions, the pre-configured lighting scene management, data logger for consumption data, limit value modules, and logic and time gates. These optimise the features and are quickly integrated.

Smart Controls

SMART CONTROL 15

Multifunctional control panel for smart buildings: The smart controls take over the control of various systems for building automation using apps. Thanks to the JUNG Launcher, all available applications are clearly displayed and can be called up directly by tapping on the respective icon. Due to the open operating system, the smart controls can be extended by other apps at any time. They are available in four different versions, depending on the application. In the most compact variant with a screen diagonal of seven inches, the Smart Control can also be mounted vertically.

VARIANTS

The Smart Controls for wall mounting are available in four sizes as required.

Server and Launcher

SMART VISU SERVER

For a standard KNX installation in private construction

VISU PRO SERVER

For complex KNX installations in commercial or private properties

SIEDLE SMART GATEWAY

For connection to the door communication

eNet SERVER

For integration in the eNet SMART HOME

With the Smart Controls, KNX and eNet SMART HOME installations and door intercom functions can be operated using only one device, also in parallel. In combination with various system servers, all settings and functions are then conveniently controlled using the apps via Launcher. Thereby, options for use in private as well as commercial construction can be selected.

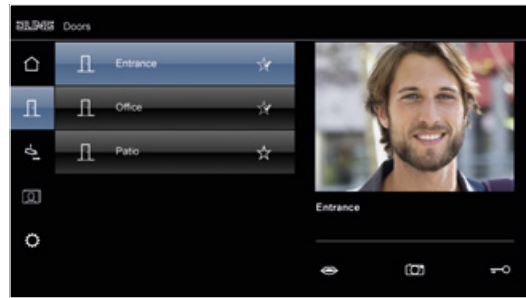

KNX

KNX functions and scenes displayed on the JUNG Launcher and individually matched to the requirements.

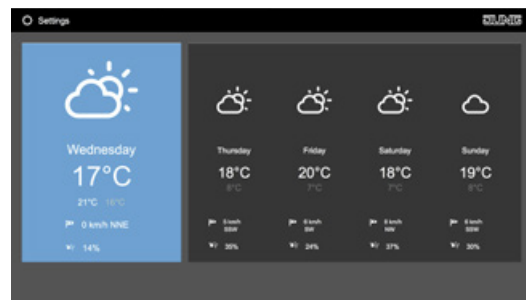

DOOR COMMUNICATION

The Smart Controls become video intercom stations using the link with the Siedle Smart Gateway.

WEATHER SCREEN

Good outlooks: The preinstalled screen shows local weather and travelling weather for the next few days.

WASTE SCHEDULER

Waste disposal dates can be registered individually; the reminder is performed automatically.

eNet SMART HOME

Visualise the wirelessly networked smart home and control via the user interface of the Smart Controls.

Smart Visu Server

Lighting mood, comfortable temperature, sun protection, music: intelligently networked, brilliantly displayed. One fingertip and the comfort scene is set. Everything controlled with a smartphone. That is how easily a home becomes a Smart Home with the Smart Visu Server.

Fast visualisation

The Smart Visu Server is integrated into the home network via the router. It is simply networked with the Smart Home using an IP connection. With the integrated start-up interface SV Control, the visualisation for the KNX installation is then built up step by step. SV Control works independently of the operating system and leads the user intuitively through the sequence for setting up.

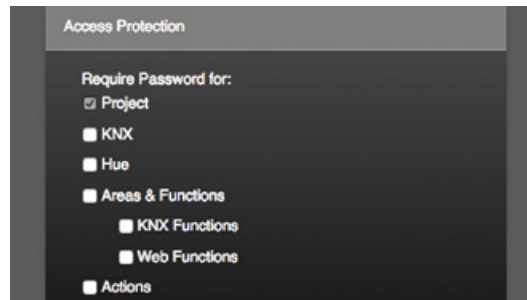

AWARD-WINNING

The Smart Visu Server with its clear, intelligent visualisation also impressed the respected expert jury of the German Design Award, the prestigious prize of the German Design Council.

PASSWORD PROTECTION

The areas that the end customer may edit himself are defined during the project handover. All others are password-protected. The password must be advised if the end customer would like to edit additional areas. This can also represent a clear handover point of the responsibility and warranty obligation.

ALWAYS UP-TO-DATE

All automatic updates and upgrades for the Smart Visu Server are listed chronologically in the "Change Log" document. This is available to download as a PDF at www.jung.de/svs.

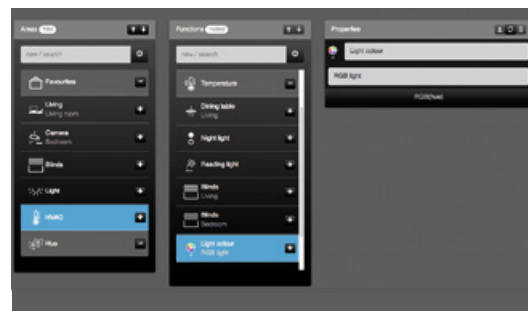

ETS IMPORT

An existing KNX installation is imported directly from the ETS using an OPC file. The group addresses are presented in a sortable list for an optimum overview and simple allocation.

Group address	Icon	Group name	Description	Length	Import date
901	Zentral-Zone	Zentral-Zone	Zentral-Zone	1 Byte	2015/01/14, 4:20:08 PM GMT+1

AREAS AND FUNCTIONS

Afterwards, areas are created first, such as rooms or trades. Functions are allocated to these areas. Both are named individually and provided with symbols. In this way, 240 functions with up to 1,200 data points can be created.

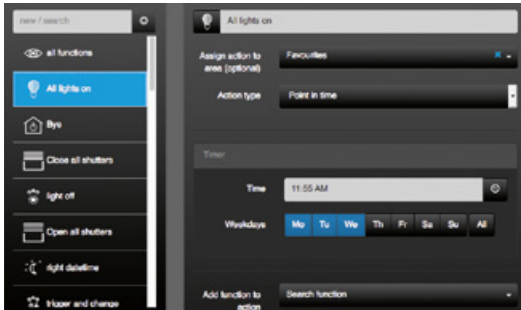

BLOCK FUNCTIONS

The new Heating, Ventilation, Climate function groups as well as Multimedia Playlist and Multimedia Mode as „block functions“ are both easier to integrate as well as to use.

Structure creates the overview and convenience: with their own, individual groups, individual actions can be combined suitably so that the user can then call them and activate them as required.

CREATE ACTIONS

To create an action, first of all it is named. Allocating meaningful names under which functions will be collected is helpful. If required, the action can then be allocated to an area, such as a particular room or trade.

ADD FUNCTIONS

Up to 16 functions can be allocated to an action and displayed in a selection list. The appropriate value is set for every function, such as "Colour light on" or "Dining table lamp on 50 %". In addition, time controls for actions can be specified.

CREATE GROUPS

Groups can then be assembled and named from the actions. For example, "Holiday" includes all actions for presence simulation, such as "Open all shutters", "Living room lamps 100 %" and "Path lighting on". Each action can be allocated to multiple groups.

USE GROUPS

Using the appropriate button on the Smart Visu Home user interface, the user can call individual groups. If the user wants to activate/deactivate or edit a group, this takes place in SV Control. The installer defines the rights via the password protection.

Feel-good lighting with the Smart Visu Server: With the connection to the Philips Hue lighting system, users can create their own personal light scene with a tap of a finger on their smartphone.

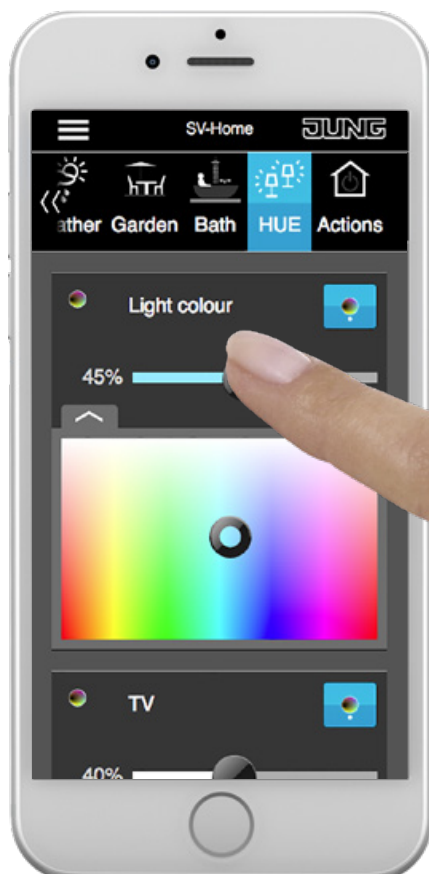

AUTOMATIC SCAN

As soon as a Hue Bridge with learnt devices/lights is recognised in the network, it can be accessed on the Smart Visu Server interface.

NAME/ALLOCATE LUMINAIRES

After the taught-in luminaires have been detected, individually appropriate names can be assigned. The lights named can then be appropriately allocated to individual areas and a room, favourite or trade.

CONVENIENT CONTROL

Control of the integrated lights is then via the Smart Visu Home user interface, as desired with a slider.

Smart Visu Home

The Smart Visu Home user interface is realised in Responsive Design. This guarantees optimal presentation and operation on almost every smart device. Landing pages, background colour, font size and other content can also be individually adapted for each device and thus for each user. Responsive Design also takes account of the use of the smart devices in portrait or landscape orientation.

Ref.-no.

Smart Visu Server

with mounting plate for wall or rail mounting installation
including plug-in power supply
with Europlug

SV-SERVER**Intended use**

- Visualisation and operation of KNX systems via devices with HTML5 browser, e.g. Smart Control (ref.-no.: SC 7 ..., SC 10, SC 15, SC 19), smartphone, tablet, laptop, PC, etc.
- Visualisation and operation of Philips Hue systems
- Operation in local IP networks, which support DHCP (Dynamic Host Configuration Protocol) or with a fixed IP address (IPv4)
- Operation indoors

Product characteristics

- Web visualisation of KNX system for status indication and operation (SV-Home)
- Integrated web-based commissioning tool (SV-Control)
- Easy to create a pre-configured user interface, optimised for domestic applications and small commercial facilities
- Graphical control elements: symbols can be selected from supplied libraries
- Import of group addresses (three-stage) via OPC import (ETS3, ETS4, ETS5)
- Manual input of group addresses possible
- 24 areas
- 240 dynamic functions (max. 1200 data points)
- 250 configurable actions (max. 16 functions per action)
 - customised
 - switching times
 - status logic
 - depending on events
- Connection to KNX bus via KNX IP router (ref.-no. IPR 200 REG) or KNX IP interface (ref.-no. IPS 200 REG)
- Integration of Philips Hue systems in the KNX installation
- Connection to Philips Hue via Philips Hue Bridge
- Update and upgrade compatible

JUNG Visu Pro

This software, as successor of Facility Pilot, is the professional way to visualise and control building automation. Multiple, independent KNX systems can be included and managed conveniently at the same time.

VISUALISATION

The visualisation can be individually customised.

GENERATOR

Imports projects created with the Smart Assistant.

COMMERCIAL USE

Visualisation and control using an HTML5-capable browser

PRIVATE USE

Can be optimally tailored to the respective application situation

The JUNG Visu Pro software is a flexible system without data point limits and is thus also perfectly suited to complex applications, whether in the private or trade field. Particularly the option to include multiple independent KNX systems parallel in one process model via

KNXnet/IP protocol creates comprehensive possibilities for property-spanning projects. The Visu Pro software can be displayed on all HTML5-capable browsers, naturally including mobile end devices.

**DEVICE EDITOR**

Integration of different systems in the visualisation.

**PROCESS EDITOR**

Configuration of process models with KNX and OPC data.

The Visu Pro software consists of various function modules, each of which clearly deals with a task. The modules/editors familiar from the Facility-Pilot for creating the visualisation have been optimised and simplified with respect to their use and graphical representation.

VISUALISATION

HTML5 visualisations are created consistently, thus guaranteeing the representation on different types of device. For this purpose, the control library has been significantly extended with HTML5 elements. The HTML5 controls can be freely placed on the spreadsheets and the look of the operating elements can be completely individualised.

CONTROL LIBRARY

The JUNG symbol set is supplied as a library in black and white. Alongside form factor, transparency and background image can be set, as well as separate views. In addition, individual symbols can also be imported and used appropriately.

PROCESS MODEL

The process model is the logical core of the system. Process connections are integrated here, logics, time functions and scenes defined and charts produced.

DEVICE EDITOR

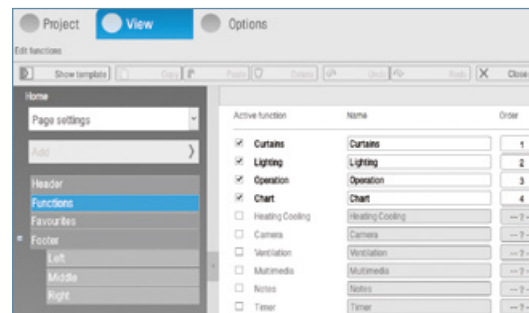

Special functions can be implemented here with process interfaces. System integrators with knowledge of LUA can independently program functions, including the communication with third party systems via TCP or UDP protocol (e.g. devices from consumer electronics).

Smart Assistant – intuitive planning assistance: To create JUNG interfaces, the system integrator can fall back on the Smart Assistant for automatic generation and thus minimise the creation effort. Visualisations can thus be prepared based on templates supplied.

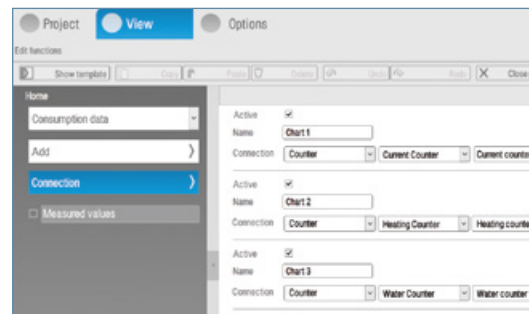

CONFIGURATION

First of all, functions, timer switches and scenes are selected from a tabular list and added to the individual project. These can be linked with each other as appropriate if required.

EXAMPLE: SMART METERING

With the production of a consumption data chart, the settings for recording various consumptions are made, such as for electricity, water and gas. The visualisation of the consumption data check is then automatically generated from this.

CREATE BUILDING STRUCTURE

Afterwards, the building structure can be produced based on the floors and rooms, in each case with individual names. The previously configured functions and scenes can be allocated as appropriate and thus transferred to the visualisation.

Visu Pro Server

The JUNG Visu Pro Server is a device for controlling building automation in conjunction with the pre-installed Visu Pro software. With its compact dimensions of 12 x 12 x 2.4 cm, the server is designed for installation on a wall rail or DIN rail. The maximum project scope is based on the templates as created using the JUNG Smart Assistant and is thus ideally suitable for applications in demanding private constructions.

NUMEROUS INTERFACES TO OTHER SYSTEMS

SD card slot

2 x USB 2.0

USB 3.0

HDMI™ connection

Gigabit-LAN

3.5 mm audio jack

Ref.-no.

Visu Pro Server

fanless, without rotating parts

English version

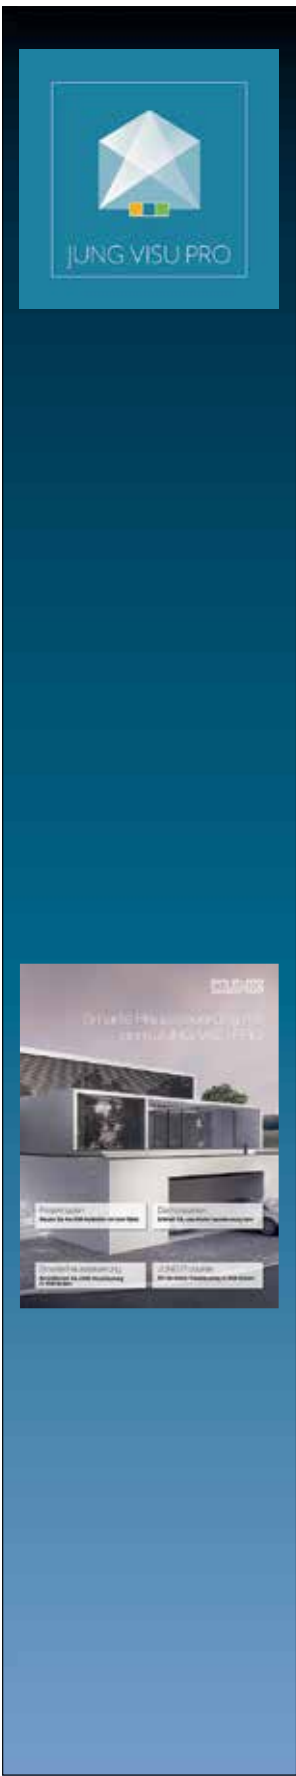

JVP-SERVER-H-GB**Intended use**

- Visualization and operation of system statuses and information on building automation in combination with JUNG Visu Pro software (pre-installed)
- Desktop device, mounting on DIN rail according to EN 60715 possible
- Max. size of the visualization project as template in JUNG Smart Assistant
- Connection to KNX bus via KNX IP router (ref.-no. IPR 200 REG) or KNX IP interface (ref.-no. IPS 200 REG)

Product characteristics

- Fanless mini PC
- JUNG Visu Pro software pre-installed and activated
- KNX interface (e.g. IPS 200 REG) needs to be ordered separately
- Windows 10 Home (64-bit) pre-installed
- Quadcore Intel Atom processor
- 2 GB RAM
- 32 GB internal memory, partly used by operating system
- 1 x HDMI 1.4
- 2 x USB 2.0
- 1 x USB 3.0
- 1 x LAN RJ45
- Dual-band WLAN
- Stand-by power max. 2 W, full load max. 7 W
- Plug-in power supply 100 ... 240 V AC / 5 V DC / 2 A (included in delivery)
- The visualization can be realized with devices with a browser suitable for HTML5 (e.g. latest version of Chrome, Firefox or Safari)
- Access from max. 10 different clients possible

	Ref.-no.
JUNG Visu Pro software	
Full version	JVP-V
Planner version	JVP-P

Note: The software can only be downloaded from the JUNG website www.jung.de. When downloading, you can choose between the English and the German version. Each installation will run in demo mode for 20 days or 400 starts. For an unrestricted use the software must be activated via a MyJUNG account.

Intended use

- Visualization and operation of system statuses and information on building automation
- The visualization can be realized with devices with a browser suitable for HTML5 (e.g. latest version of Chrome, Firefox or Safari)
- Access from max. 25 different clients possible

Requirements

Hardware

as Visu Pro Server (ref.-no.: JVP-SERVER-H-GB) or better

Please note: The performance of the hardware is one of the limiting factors for the project size.

Operating systems

Windows 7 Home, Professional and Ultimate (32- and 64-bit) or higher, not Windows 2008 or 2012 Server

Process connection

The Falcon driver of the KNX Association is used for the KNX bus. The KNX connection requires a suitable version of the Falcon driver and the respective interfaces.

An optional OPC client for the visualization allows the use of an OPC server instead of / in addition to KNX.

Data import from ETS

ETS5: use of project export of ETS

ETS2 version 1.1, 1.2 and 1.3: files generated

ETS4: use of project export of ETS

by "print export" can be read

ETS3: use of OPC export of ETS

Previous ETS versions: not possible

Software

Falcon driver 2.2

Internet Explorer

DirectX, version 9.0c

.NET framework 3.5 SP1

JUNG App Visu Pro

App for remote control of all JUNG KNX devices with integrated Visu Pro software: You can control all functions with your iPad in a convenient and flexible way. The clearly structured visualization ensures an intuitive operation. In addition to controlling your own KNX installation the app also includes a demo version. The free App "Visu Pro" can only be downloaded from the iTunes Store.

Smart Assistant

	SMART-ASSIST
--	---------------------

Note: The software can only be downloaded from the JUNG website www.jung.de.

For an unrestricted use the software must be activated via a MyJUNG account.

Smart Assistant is a planning tool for the simple creation of visualization projects for the JUNG Visu Pro software or other automation applications such as iHaus. The use of conventions and schemes (trade, floor, room, function) does not require knowledge of KNX group addresses.

Export formats are available for JUNG Visu Pro software, iHaus and ETS group addresses.

Requirements

Server/client-based software, but can be used with one PC

Operating systems for server: Windows 7 Home, Professional and Ultimate (32- and 64-bit) or higher, not Windows 2008 or 2012 Server

Clients: Browser suitable for HTML5 (e.g. latest version of Chrome, Firefox or Safari)

SMART CONTROL 7
as video intercom station

Door communication and KNX

Combined operation of building system technology and building communication – for greater security and convenience: The Siedle Smart Gateway functions as interface to the door communication in a KNX installation. The JUNG KNX Smart Controls 7, 10, 15 and 19 and smart devices become intuitively usable video intercom stations using this.

Terms and Conditions of Sale and Supply

I. General provisions

- 1) The mutual written declarations shall determine the scope of the supplies and services (hereinafter: supplies). However, General Terms and Conditions of Business on the part of the customer shall only apply insofar as we have expressly approved the same in writing.
- 2) We shall unrestrictedly reserve our exploitation rights under proprietary right and copyright law to cost estimates, drawings and other documents (hereinafter: documents). Such documents may only be rendered accessible to third parties with our prior consent and, upon request, shall, in the event that we should not be awarded the commission, be returned to us without delay. Sentences 1 and 2 shall apply mutatis mutandis to the customer's submissions, though such submissions may be rendered accessible to third parties to whom we have admissibly assigned responsibility for supplies.
- 3) Partial supplies shall be admissible insofar as the customer may be reasonably expected to accept the same.

II. Prices and Terms and Conditions of Payment

- 1) Prices shall be understood to be ex-works excluding packaging and plus the statutory sales tax obtaining at any given time.
- 2) Packaging shall be invoiced at the lowest possible prices and shall not be taken back.
- 3) Insofar as nothing is agreed to the contrary, payment shall, irrespective of the receipt of the goods involved, be made to us net within thirty days of the invoice date or within eight days with a 2 % discount. In the event that the payment deadline should be exceeded interest shall, without a reminder being required, be calculated pursuant to § 288 German Civil Code.
- 4) We shall be entitled to request advance payments in respect of the invoice amounts at any time prior to the dispatch of goods insofar as we deem such a step to be necessary. Should the customer default on the fulfillment of payment obligations or should the information pertaining to a customer no longer be satisfactory, we shall be entitled to request security for delivered goods or, once a payment deadline has been set, withdraw from the purchase contract.
- 5) The customer may only offset receivables which are undisputed or have been established on a legally binding basis.

III. Reservation of title

Goods shall be supplied subject to reservation of title involving the following extensions:

- 1) All supplied goods shall remain our property until such time as our claims vis-à-vis the customer, including any such claims which may arise from the business link in the future, are settled in full and for such time as the account, including the bill and cheque commitments, has not been settled. This shall also apply in the event that the purchase price for certain deliveries of goods specified by the customer is to be paid. In the case of a current account, the reserved title shall constitute security for our balance claim.
- 2) The customer shall be revocable and, as long as they fulfill their obligations vis-à-vis ourselves and affording consideration to the following provisions, entitled to sell and process during the normal course of business goods which are encumbered with reservation of title. However, the customer shall be forbidden from pledging or assigning as security goods subject to reservation of title which are supplied or processed. The customer shall, insofar as this is compatible with commercial practices, likewise undertake only to resell reserved goods which we have supplied in conjunction with reservation of title. Upon justified request and in the case of default, the customer shall be obliged to apprise us of the name of the third party customer.
- 3) Insofar as goods encumbered with reservation of title are processed, such processing shall, though without any guarantee on our part, be effected for us. In the event of processing by the customer in conjunction with goods which are not our property, we shall be entitled to co-ownership of the new object at the ratio of the value of the reserved goods to the other processed goods on the processing date.
- 4) In the event that goods which we have supplied should be combined with other goods, we shall acquire co-ownership of the amount of the ratio of the value of the reserved goods in the combination date.
- 5) Should the customer sell reserved goods which we have supplied or should such goods be supplied to a third party – irrespective of what value or in which condition – or should such goods be installed within the framework of a work, work performance or a construction contract, the customer shall, until such time as the claims stipulated in subsection 1) are settled in full, hereby assign to us, to the amount of the invoice value of our deliveries, the claim, together with all ancillary rights, including the compensation claims accruing to them from the legal transaction involving the resale or installation, according to them vis-à-vis their customer or buyer from such sale, delivery or instalment. In the event of an assignment being obtained in such work, work performance or construction contract and in the event of payment default, the customer shall undertake to apprise their third party customers of the advance assignment.
- 6) In the event that reserved goods which we have supplied should be sold to third parties in conjunction with other goods, we shall be assigned that proportion of the total asking price corresponding to the invoice value of our deliveries.
- 7) The reservation of title with the extensions pursuant to the above provision shall also remain in force in the event of individual claims against their customer on the part of the customer being included in the current account. In this case, the customer shall, at this early juncture, assign to us the balance obtaining to their credit. The customer shall, upon request and particularly in the event of payment default on the part of the purchaser, be obliged to facilitate the direct assertion of the claims involved and apprise the third party debtor of the assignment.
- 8) We shall be appraised without delay of any attachment and every kind of restriction which obtain in respect of our property. In the event that the value of the overall collateral stemming from the business link with which we have been furnished should exceed our delivery claims by more than 20 %, we shall, at the request of the purchaser, be obliged to reassign the assigned claims to such extent.
- 9) In the event of any incidence of damage or other impairment to the equipment supplied on the basis of our terms and conditions, the purchaser shall, at this early juncture, assign to us in advance the compensation claim accruing to them vis-à-vis the insurer from their insurance to the amount of the incidence of damage in question to our reserved property.

IV. Deadline for deliveries; default

- 1) The deadline for deliveries or services shall commence on the day on which written agreement pertaining to the order in question obtains between the customer and ourselves. The observance of such deadline shall presuppose the prompt receipt of all the documents, requisite licences and releases to be furnished by the customer, the prompt clarification and approval of the plans and the observance of the agreed Terms of Conditions of Payment and other obligations. Should these prerequisites not be fulfilled on time, the delivery deadline shall be extended by an adequate period of time; this shall not apply in the event that we should be responsible for a delay.
 - 2) Should the non-observance of deadlines be attributable to force majeure, such as mobilization, war civil commotion or similar occurrences, e.g. strike or lockout, delivery deadlines shall be extended by adequate periods of time.
 - 3) In the event that dispatch or delivery should, at the behest of the customer, be delayed by more than one month following notification of dispatch readiness, the customer may, for every started month, be invoiced storage costs to the amount of 0.5 % of the price of the delivery objects, though no more than a total of 5 %.
- The contracting parties shall be at liberty to prove that lower or higher storage costs have accrued.

V. Transfer of risk

The risk shall also pass to the customer in the event that carriagepaid delivery should have been agreed. In the absence of a written arrangement to the contrary, dispatch shall always be effected according to our best judgement. We shall not assume any responsibility for transportation at market prices. We shall only arrange transport insurance policies the costs of which are borne by the purchaser upon express, written agreement.

VI. Acceptance

The customer may not refuse to accept deliveries on the grounds of the existence of minor defects.

VII. Material defects

- 1) The prerequisite for the assertion of material defects liability shall be the submission to us or our authorized representative of proof of acquisition (delivery note, invoice, etc.). The warranty entitlement may not be transferred to third parties without our consent.
- 2) All those components or services shall, as we see fit, be repaired, resupplied or refurbished which feature a material defect within the limitation period – irrespective of operating life – insofar as the origin of the same obtained at the point in time of transfer of risk.
- 3) Material defects claims shall lapse after twelve month. This shall not apply insofar as the law pursuant to §§ 438, paragraph 1, no. 2 (constructions and objects for constructions), 479, paragraph 1 (claim under a right of recourse) and 634a, paragraph 1, no. 2 (construction defects) German Civil Code makes provision for longer periods of time, in instances of injury to life, body or health, in the event of a willful or grossly negligent breach of duty on our part and in the event of the malicious nondisclosure of a defect. The statutory provisions pertaining to the suspension of the running of a period, suspension and recommencement of periods shall remain unaffected.
- 4) The customer shall submit complaints pertaining to material defects to us in writing without delay.
- 5) In the event of notifications of defects, payment on the part of the customer may be withheld on a scale which is in a reasonable ratio to the material defects which have occurred. The customer may only withhold payments should a complaint be asserted the justification of which is beyond doubt. Should a complaint have been submitted without justification, we shall be entitled to request that the customer reimburse the costs which we incurred.
- 6) In the first instance, we shall be granted the opportunity to effect subsequent fulfillment within a reasonable period of time.
- 7) Should such subsequent fulfillment be unsuccessful, the customer – any compensation claims pursuant to subsection IX notwithstanding – may withdraw from the contract or reduce the amount of payment.
- 8) Claims arising from defects shall not obtain in respect of a minor deviation from an agreed quality, a minor impairment to usefulness, natural wear and tear or incidences of prejudice which arise subsequent to the risk transfer in consequence of faulty or negligent handling, excessive strain, unsuitable operating facilities, faulty construction operations, unsuitable subsoil and, in particular, any external influences which are not presupposed by the contract, as well as in respect of non-reproducible software defects. In the event that modifications or maintenance operations should be improperly performed by the customer or any third parties, it shall likewise be the case that no claims arising from defects shall obtain for such modifications and maintenance operations or any resulting consequences.
- 9) Any claims on the part of the customer for expenditure which it is necessary to incur for subsequent fulfillment purposes, particularly transport, travelling, labour and material costs, shall be excluded insofar as such expenditure increases due to the fact that a delivery object has been subsequently transported to a location other than the customer's business premises unless such transportation is in line with the normal utilization of such object.
- 10) Claims under rights of recourse vis-à-vis ourselves on the part of the customer pursuant to § 478 German Civil Code (contractor's recourse) shall only obtain insofar as the customer has not agreed any arrangements with their customer exceeding the scope of the statutory claims arising from defects. No. 9 shall additionally apply mutatis mutandis to the scope of the customer's claim under a right of recourse vis-à-vis ourselves pursuant to § 478, paragraph 1 German Civil Code.
- 11) It should be noted that subsection IX (other compensation claims) shall apply to compensation claims. Any more farreaching claims for a material defect against us and our vicarious agents on the part of the customer and any claims for a material defect against us and our vicarious agents on the part of the customer other than those stipulated in subsection VII shall be excluded.

VIII. Impossibility, contractual revision

- 1) Insofar as a delivery is impossible the customer shall be entitled to claim compensation unless we are not responsible for such impossibility. However, the customer's entitlement to compensation shall be restricted to 10 % of the value of that component of the delivery which cannot be put into appropriate operation in consequence of such impossibility. This entitlement shall not apply insofar as, in cases of wilful intent, gross negligence or injury to life, body or health, compulsory liability obtains; this shall not entail a change in the burden of proof to the detriment of the customer. The right of the customer to withdraw from the contract shall remain unaffected.
- 2) Insofar as any unforeseeable occurrences within the purport of subsection IV, no. 2 considerably alter the economic importance or the object of a delivery or exercise a major influence on our operations, the contract shall be suitably revised in compliance with the principle of good faith. Insofar as this is not economically justifiable, we shall be entitled to withdraw from the contract. In the event that we should wish to exercise this right of withdrawal, we shall apprise the customer accordingly without delay upon becoming cognizant of the implications of the occurrence in question, including in the event that an extension of the delivery period should initially have been agreed with the customer.

IX. Other compensation claims

- 1) Claims for compensation and claims for the compensation of expenses (hereinafter: compensation claims), irrespective of on which legal grounds, particularly for a breach of the duties arising from the contractual obligation and for tortious acts, shall be excluded.
- 2) This shall not apply insofar as compulsory liability obtains, e.g. pursuant to the Product Liability Act, in cases of wilful intent, gross negligence, injury to life, body or health and a breach of major contractual obligations. However, a claim to compensation for a breach of major contractual obligations shall be restricted to the contractually typical, foreseeable prejudice insofar as wilful intent or gross negligence do not obtain or liability obtains due to injury to life, body or health. The above stipulations shall not entail a change in the burden of proof to the detriment of the customer.
- 3) Insofar as the customer is entitled to compensation claims pursuant to subsection IX, such claims shall lapse upon the expiry of the limitation period pursuant to subsection VII, no. 3 applying to claims for material defects. In the case of compensation claims pursuant to the Product Liability Act, the prevailing statutory limitation provisions shall apply.

X. Diagrams, measurements and weights

Diagrams, measurements and weights shall always be regarded as approximate.

XI. Place of performance, place of jurisdiction and applicable law

- 1) Insofar as nothing to the contrary is agreed, the place of performance shall be Schalksmühle.
- 2) In the event of the customer being a businessman, the sole place of jurisdiction for all disputes arising directly or indirectly from the contractual relationship shall be Hagen. However, we shall also be entitled to institute legal proceedings at the place of domicile of the customer.
- 3) German substantive law shall, to the exclusion of the UN Convention on Contracts pertaining to the International Sale of Goods (CISG), apply to the legal relations obtaining in connection with this contract.

XII. The remaining provision of the contract shall continue to have binding force even in the event of the legal invalidity of any of the individual provisions contained in the same. This shall not apply in the event of adherence to the contract constituting unreasonable hardship for one of the contracting parties.

Further information

Good to know: Brochures, films, websites and web portals – further information, tools and practical supplements for the smart JUNG technology can be found here.

JUNG BROCHURES

KNX – THE SECURE AND SAFE STANDARD

Worldwide standard: the KNX system with benefits, application examples and references from commercial building and private home construction. Including checklist for the „Security“ subject.

KNX SMART HOME

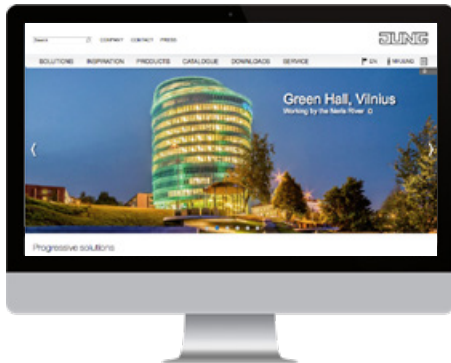

The intelligent home – professionally realised using solutions from JUNG. With advantages and application examples; ideal for the customer discussion.

eNet SMART HOME

Smart wireless technology, intelligently retro-fitted. Systematics, modules, advantages and strong partners. With practical application examples.

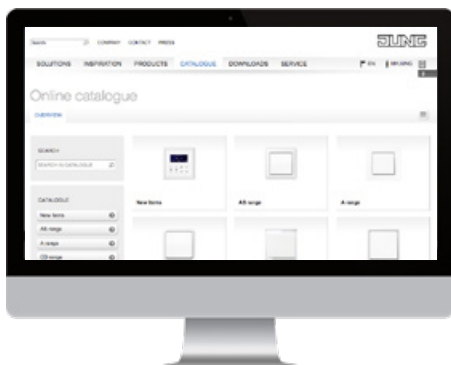

WEBSITES AND ONLINE PORTALS

JUNG WEBSITE

All information about the KNX solutions can be found thematically prepared and illustrated on the JUNG website. Naturally also with further links and download material.

jung-group.com

JUNG ONLINE CATALOGUE

Technical information for viewing and for download is attached to the individual JUNG articles in the online catalogue.
